**1984 BENEFIT AUCTION**

**SANTA CLARITA VALLEY BOYS' & GIRLS' CLUB**

## OUR APPRECIATION AND WELCOME

The Santa Clarita Valley Boys' and Girls' Club gratefully acknowledges the generosity of all donations pledged in support of our 1984 Benefit Auction. It is through the far-reaching contributions of individuals, businesses and industries that tonight's Auction is presented. Your support continues to touch and enrich the lives of the youngsters of our community. It is through your concern and generosity that this youth organization exists.

We wish you a highly enjoyable evening and hope you continue to help us by bidding generously on the Auction items. The Santa Clarita Valley Boys' and Girls' Club welcomes you to its 13th Annual Benefit Auction.

**1983 Boys' and Girls' of the Month**

The Boys' and Girls' Club is a youth guidance organization providing meaningful activity and character building programs for youngsters in the Santa Clarita Valley. Founded in 1968, it is part of a national network of organizations affiliated with Boys' Clubs of America. A non-profit agency, the organization is a member agency of the United Way and the club receives no tax dollars nor governmental support.

The most inclusive club in the Santa Clarita Valley, the agency provides daily activities at six sites. Conveniently located on school grounds, the club is within easy walking distance for a large number of children. The well-rounded program includes social recreation, co-ed sports leagues, arts and crafts, special events, community service activities and youth guidance. The program operates during after-school and evening hours when youngsters are best able to attend.

The Boys' and Girls' Club employs a professional staff who are trained in the Boys' Club philosophy of providing informal guidance through individual and small group experiences. By recognizing and responding to the restless energies and a youthful quest for "something to do", the Boys' and Girls' Club gives youngsters a chance to improve their lives by allowing them to develop values and skills during critical periods of growth.

Open eleven and one-half months each year, perhaps those who benefit most are children residing in families where both parents work, or in families where there is only one parent.

From its inception the Boys' and Girls' Club has responded to growing needs for youth services through planned expansion and program development.

Through the Boys' and Girls' Club today's youth gain a sense of usefulness and competence and a chance to connect with the promise of a future. We are committed to building that future, one step at a time, one child at a time.

## Live Auction

1. **The Live Auction** will begin at **8:30 p.m.** and will run to approximately **11:00 p.m.** It will consist of the **voice auctioning of Items LA1 through LA44** in the order they appear in this catalogue and in the addendum.
2. **All bidding** at the auction will require a **bid number**. Your personal bid number is located on the **back of your catalogue** along with your registration certificate. Fill out your registration card in advance to avoid congestion at the entrance on the auction evening. A bid card is required for all bidding and purchasing of items.
3. **During the live auction**, when you want to bid on an item, **wave your pom-pom or catalogue number** as frantically as possible to attract the auctioneer's or spotter's attention. If you win an item, immediately announce your **bid number** to the auctioneer or spotter and remain in your seat.
4. A **"runner"** will bring a sales slip directly to you, indicating the prize you have purchased and the amount of your winning bid. You may wait until the end of the evening and pay for all your purchases at one time at the check out booth.
5. **All goods (not services)** are subject to the **6½% California sales tax which will be added to the amount of your purchase. (With the exception of item numbers LA29, LA30 and LA43 where tax and license are to be paid separately, based upon retail price.)**

**LA42 HIGH ENERGY SOLAR WATER HEATING.** This Photo-Circ H.W. system offers all components for an "active", roof-top, solar water heating system plus state-of-art efficiency not requiring outside electricity. Begin with this 40 sq. foot solar thermal collector that develops and delivers solar heated water to your existing hot water heater. Then add this co-located photovoltaic "energy collector" panel, originally designed by NASA scientists, and Power-Pulse control module installed on your water heater. The "energy collector" will sense sun intensity, proportionately control water flow into your water heater through the Power-Pulse module during hours of sunlight, and prevent flow from the thermal collector during hours of darkness. This system will input more hot water into your water heater each 24 hours than a conventional active solar system using differential tem-

perature controllers by preservation of energy collected during the day. The fourth element of this system is the "Guardian", a freeze protection device mounted onto the solar collector, that will drain the solar panel when there is a threat of freezing temperatures that could damage your investment. This "first of its kind" item for our auction, optimized for an existing 40 - 80 gallon water heater, includes a thermal blanket for your water heater, a timer to prevent your gas or electric water heater from competing with this "free energy" system during prime daylight hours, mounting hardware and plumbing. Please check the catalogue addendum auction night to see if installation has been included for this common sense approach to heating your domestic hot water.
