## 1. SUMMARY

The City of Santa Clarita is proposing to construct the 1,100-foot-long Golden Valley Road bridge over the Santa Clara River. The project is located within the City of Santa Clarita in Los Angeles County, California. The proposed typical section of the bridge would include a six-lane roadway with a 14-foot median island, and pedestrian and bicycle lanes. Generally, the total curb-to-curb width would be approximately 90 feet with a total ROW width of approximately 120 feet. This Hazardous Waste Assessment was prepared for Caltrans and the City of Santa Clarita by EDAW, Inc. (EDAW) in support of the Golden Valley Road Bridge Project. The purpose of this study is to identify and evaluate potential hazardous waste materials within the proposed boundary of the Golden Valley Road bridge over the Santa Clara River.

An Initial Site Assessment Environmental (ISA), which identified and evaluated potential hazardous waste materials within the project area, was completed for the proposed Cross Valley Connector East project in November 2005 by Dokken Engineering (Dokken). At that time, the proposed project consisted of the extension of Newhall Ranch Road by approximately 3.2 kilometers (2 miles) from its existing terminus at Bouquet Canyon Road to a future intersection with Golden Valley Road, and the extension of Golden Valley Road southwards to terminate approximately 610 meters (2,000 feet) north of Soledad Canyon Road at the terminus of the Golden Valley Road bridge project, then under construction. The project scope has since been reduced in geographic extent to consist only of construction of the Golden Valley Road bridge, which is an approximate 1,100-foot-long bridge spanning the Santa Clara River.

In addition to the ISA agency database records within the project site area were identified by Environmental Data Resources (EDR). EDR provides valuable information about environmental risk management, including government record checks and historical property data identifying businesses previously on a site that may have had hazardous materials or hazards issues.

Based on prior reports, site visits, and information obtained from our research, the project site does not contain any known hazardous waste or concern for hazardous waste contamination. One nearby site has been identified as an "Area of Potential Concern". The Bermite Division of Whittaker site is an active California Environmental Protection Agency (EPA) Agency Annual Workplan (AWP) site located within 1/8 mile of the proposed project. The site may have groundwater and soil contamination, and though the proposed project will not encroach on the contaminated site, there is a possibility that contaminated groundwater may have migrated underneath the proposed project site.

---

## 2. PROJECT LOCATION AND DESCRIPTION

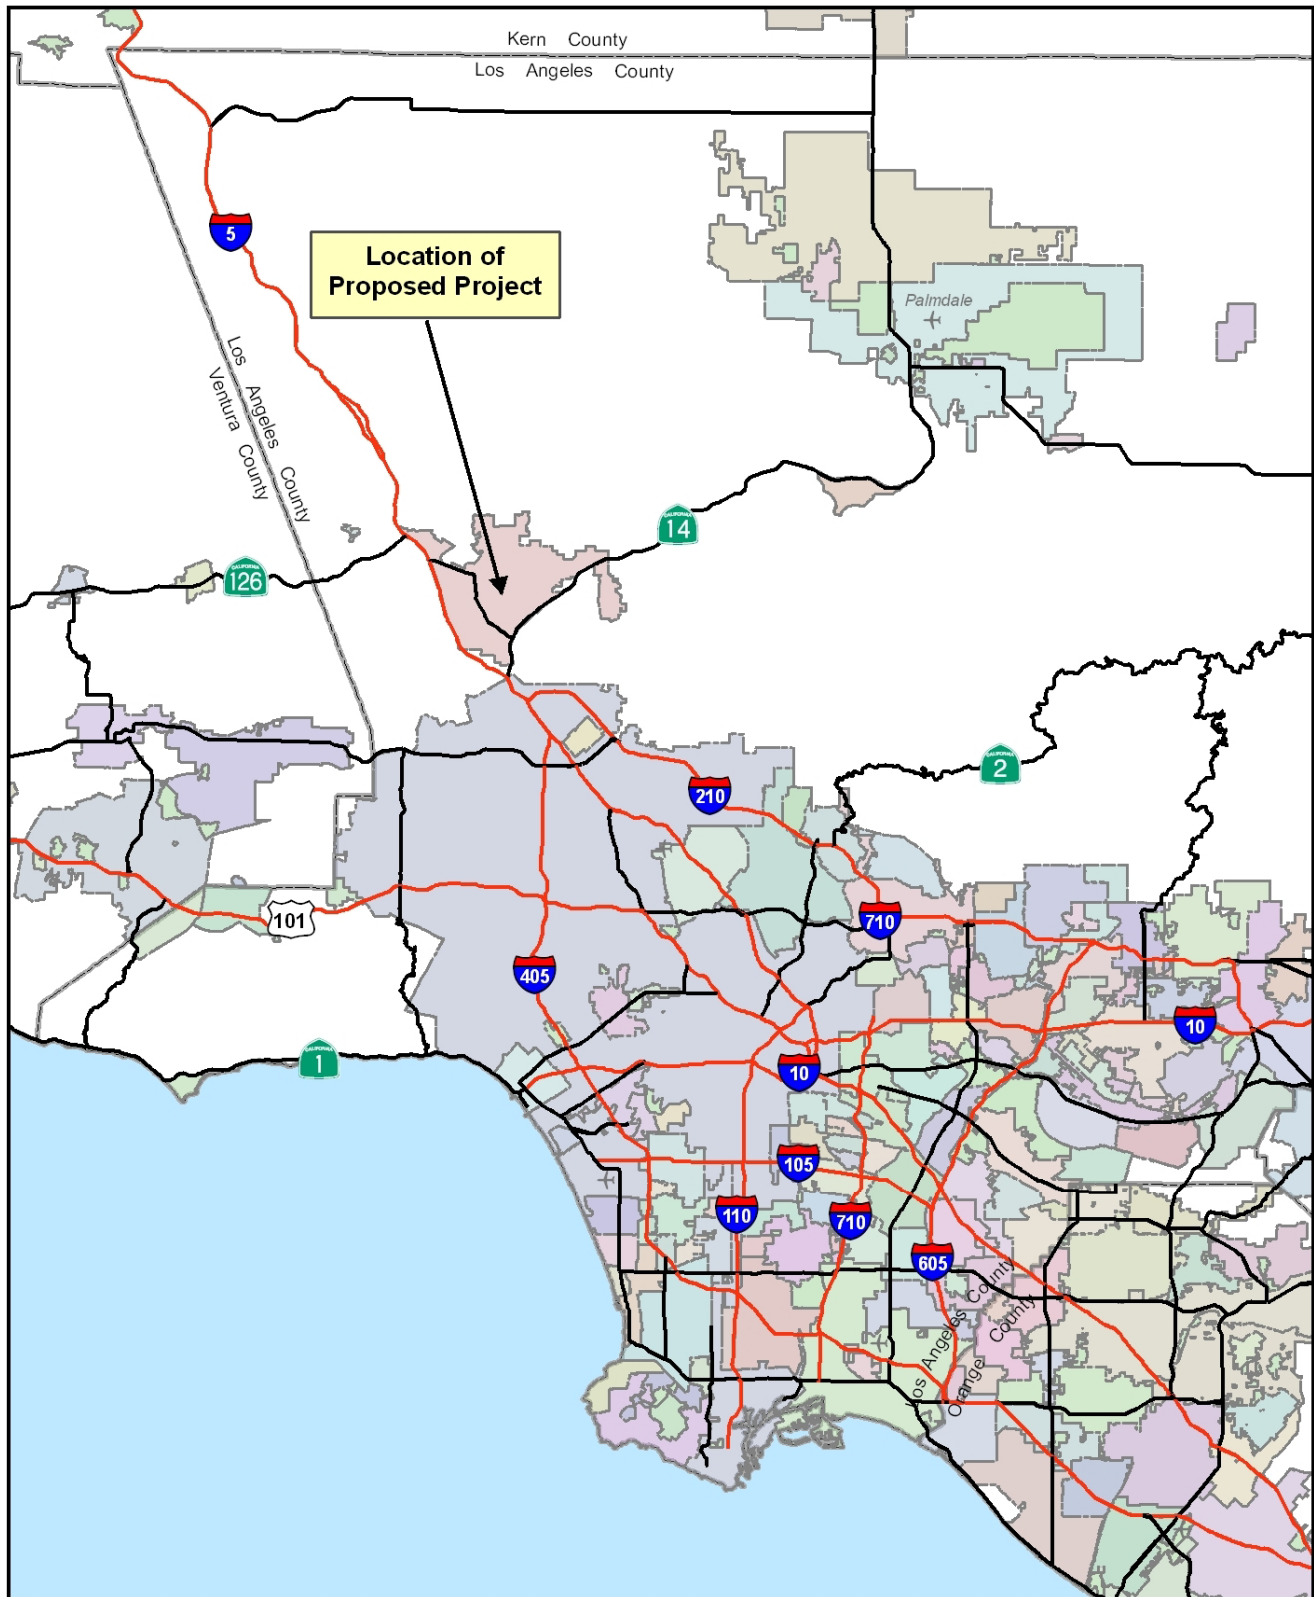

The City of Santa Clarita is proposing to construct the 1,100-foot-long Golden Valley Road bridge over the Santa Clara River. The project is located within the City of Santa Clarita in Los Angeles County, California (Figure 1). The northern terminus of the proposed project would be the eastern-most extent of Newhall Ranch Road, which is currently under construction to the northwest of the project site (see Figure 2). Grading for the majority of Newhall Ranch Road is complete and construction is anticipated to be completed between October 2007 and April 2008. The southern terminus of the proposed project would lie at the northern-most extent of the Golden Valley Road/ Soledad Canyon Ranch Interchange, which has recently been completed but is not yet open for public access.

The primary objectives of the proposed project are:

- to provide an additional east-west transportation corridor across the Santa Clara River as specified in the City's General Plan;
- to complete an essential portion of the Cross Valley Connector project, eventually creating an east-west route across Santa Clarita Valley connecting Interstate 5 (I-5)/State Route 126 (SR 126) in the west to State Route 14 (SR 14) in the east;
- to alleviate traffic congestion along Soledad Canyon Road and Bouquet Canyon Road;
- to eliminate out-of-direction travel and improve inter-regional travel by improving east-west mobility;
- to improve local access to commercial and industrial areas within the City;
- to improve local air quality; and;
- to construct a roadway that would minimize environmental hazards.

The proposed typical section of the bridge would include a six-lane roadway with a 14-foot median island, and pedestrian and bicycle lanes. Generally, the total curb-to-curb width would be approximately 90 feet with a total ROW width of approximately 120 feet (Figure 3).

The Golden Valley Road Bridge Project, along with other approved segments and intersection improvements currently under construction or recently completed will complete the Cross Valley Connector. The Golden Valley Road bridge is part of the larger Cross Valley Connector Project that is being undertaken by the City of Santa Clarita. The City's Circulation Element analyzed the entire alignment at a programmatic level under the California Environmental Quality Act (CEQA) and the National Environmental Policy Act (NEPA). The Cross Valley Connector will provide needed traffic relief to currently congested arterial roadways by augmenting east-west roadway capacity between the I-5/SR 126 and SR 14.

### 3. HAZARDS IDENTIFICATION EFFORTS

Initial investigations for this project began with a thorough search of government record checks and historical property data obtained from Environmental Data Resources (EDR). As noted earlier, the ISA prepared by Dokken was also consulted in preparation of this report. A new database search was completed by EDR to supplement existing information in the Dokken report. An agency records search identifies business types located within the project study area that would be likely to store, transfer, or utilize large quantities of hazardous materials, while searching property records enables determination of historical and current land use for the site.

Table 1 shows the environmental regulatory databases that were reviewed for the project site, as well as adjacent and nearby properties, and provided in the EDR report. A copy of the EDR Radius Map report is provided as Exhibit A. Tables 2 and 3 list the American Society for Testing and Materials (ASTM) standards at the Federal and State levels, respectively

#### 4. HAZARDOUS MATERIALS IDENTIFIED

The following nearby sites were found within the search radii noted below.

##### **Within ¼ mile of project limits:**

A total of 13 Federal or State ASTM Standard sites were listed within ¼ mile of the project limits. The Whittaker Bermite site, which accounts for 12 citations, appears in the following 10 databases:

- CERCLIS
- CORRACTS
- RCRAInfo
- AWP
- CAL-SITES
- NFA
- CORTESE
- LUST
- HIST LUST
- SWEEPS<sup>2</sup>

The site was listed more than once on the CORTESE database as several public drinking water wells on the site were found to contain contaminants. The Saugus Union School District (22211 Newhall Ranch Road) was the other listed site, which was included in the SWEEPS UST database.

##### **¼ to ½ mile of project limits:**

The database search identified no Federal or State ASTM Standard sites within ¼ to ½ mile of the project limits.

##### **½ to 1 mile from project limits:**

There is one listed site within ½ to 1 mile of the project site: American Cyanamid, which is listed in the CORRACTS database.

The following describes the listings identified on database lists in greater detail.

1. American Cyanamid (21444 Golden Triangle Road)  
According to the EDR database, the facility is identified on the CERCLIS-NFRAP (No Further Remedial Action Planned) list. Sites that qualify as NFRAP sites include: sites where no contamination was found following an initial investigation; sites where contamination was removed quickly enough for it to not be placed on the NPL (National Priority List); or sites where contamination was found but was not serious enough to require NPL or Federal Superfund Action consideration. Since the American Cyanamid site is on the CERCLIS-NFRAP list, it is not considered to be a potential concern.

This site was also included on the RCRA CORRACTS (Corrective Action Sites) list, which includes sites where contamination has been found and remediation is underway. According to the CORRACTS database, this facility was assigned a low corrective action priority on September 15, 1991. The RCRAInfo database

---

<sup>2</sup> Not updated or maintained since 1994

---

indicates that the site achieved compliance with all federal actions on March 8, 1994. The Simply Discount Furniture store has occupied the site since 1995.<sup>3</sup>

2. Bermite Division of Whittaker (22116 West Soledad Canyon)

Part of the Bermite site is in purchase offer with the City, who plan to construct a commuter railroad station. The site was owned by the Halifax Powder Company when it opened in 1906, and was later sold to the Bermite Corporation in the 1930s. The property was purchased from Bermite by Whittaker Corporation in 1967. The facility closed twenty years later in 1987. This site was the location of the manufacturing of fireworks, explosives, rockets and munitions.<sup>4</sup> The Whittaker Bermite site is currently listed on 10 different agency lists.

The historical database search indicates that portions of this site were used as on-site disposal and storage for hazardous waste. There have also been some accidental explosions on the site. According to the EDR report, Martin Industrial Plumbing used this site for storage of hazardous waste containers, dumpsters, and tanker-tractor trailers. The site is listed as an active California Environmental Protection Agency Annual Workplan (AWP) site, and was also assigned a high corrective action priority according to the RCRA CORRACTS database on June 9, 1998.

The EDR report indicates that the Whittaker Bermite site is contaminated with Ammonium Perchlorate (Perchlorate). Perchlorate is a widely used inorganic chemical in the manufacture of fireworks, explosives and rocket propellants. This chemical is known to inhibit the thyroid gland to produce thyroid hormones, which are critical to the normal development of the central nervous system in fetuses and infants.<sup>5</sup> As indicated in the Dokken report, several sections of the site have undergone soil mediation cleanup, which has allowed those portions of the site to be used for municipal purposes, including a new Metrolink station and a school.<sup>6</sup>

In order to assess the risk that the Bermite site may have to the original Cross Valley Connector East, Dokken consulted the “Eastern Santa Clara Subbasin Groundwater study Conceptual Hydrogeology Technical Memorandum” prepared by CH2MHill for the U.S. Army Corps of Engineers. Dokken also consulted a website<sup>7</sup> that provides extensive information related to the clean-up of the site. These studies present the extent and potential treatment of groundwater contamination, and show that the observed level of perchlorate contamination lessens with the distance from the Bermite site. The studies also indicate that contamination levels decrease at a faster rate north of the site<sup>8</sup>, which is where the proposed Golden Valley Road bridge project would be located.

<sup>8</sup> Jason M. Lemons P.E. (Dokken Engineering), “Initial Site Assessment for the Cross Valley Connector East Project”, page 10. Prepared November 23, 2005.

---

The Dokken report considered the Whittaker Bermite site to be an Area of Potential Concern, and offers the following recommendation:

“The Whittaker Bermite site is considered to be an Area of Potential Concern. Though low, there is the potential of encountering contaminated groundwater when constructing the Golden Valley Road bridge. If groundwater is encountered during construction, the Department of Toxic Substances Control (DTSC) should be notified and the water should be tested for contamination. It is recommended that construction techniques that minimize or eliminate the need for groundwater extraction be applied to the design of the bridge. It is further recommended that the groundwater and soils in proximity to the proposed bridge structure be tested for (perchlorate) contamination during the final design of the project.”<sup>9</sup>

Given the applicability of this statement to the Golden Valley Road bridge, this hazardous materials study for the Golden Valley Road Bridge Project likewise recommends inclusion of this mitigation measure into the project. Additionally, should groundwater be encountered during construction, a dewatering permit shall be obtained from the RWQCB.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

# EXECUTIVE SUMMARY

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## FEDERAL RECORDS

**CERCLIS:** The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 02/01/2006 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

**RCRAInfo:** RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are

## EXECUTIVE SUMMARY

individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/09/2006 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>

## EXECUTIVE SUMMARY

**NFA:** This category contains properties at which DTSC has made a clear determination that the property does not pose a problem to the environment or to public health.

A review of the NFA list, as provided by EDR, and dated 08/08/2005 has revealed that there is 1 NFA site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
WHITTAKER BERMITE/RAIL STATION	22116 WEST SOLEDAD CANY	1/8 - 1/4 SSE	A2	7

**CORTESE:** This database identifies public drinking water wells with detectable levels of contamination, hazardous substance sites selected for remedial action, sites with known toxic material identified through the abandoned site assessment program, sites with USTs having a reportable release and all solid waste disposal facilities from which there is known migration. The source is the California Environmental Protection Agency/Office of Emergency Information.

A review of the Cortese list, as provided by EDR, and dated 04/01/2001 has revealed that there are 3 Cortese sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>

Comments :

After review of a PEA and supplemental information, the Department concurred with the NFA recommendation. The site is identified as a 10.3 acre Santa Clarita Commuter Rail Station site. It comprises a very small portion of the Whittaker Bermite RCRA facility. The subject site did not house any of the RCRA units.

The site composed of 976 acres and 23 acres out of it is in a purchase offer with the city of Santa Clarita for the construction of commuter rail road station. 10.3 acres of this 23 acres property is discussed under Site A. The Halifax Powder Company opened the facility in 1906 which was purchased by the Bermite Corp in 1930s. Whittaker Corp purchased the property from Bermite in 1967. The facility was closed in 1987. The buildings have been demolished and the facility is currently not operated. The explosives manufacturing plant at the Bermite Facility operated between 1906 and 1987. At the time of closure in 1987, 14 RCRA Unit with ISD Permits had operated at the site. A history of on-site disposal and accidental explosion had occurred at the site. The 10.3 acre parcel was used as a storage area in the past. The site is listed on cortese. Also, listed on RWQCB's LUST. Martin Industrial Plumbing used the site for storage of Haz Waste containers, drumpsters, and tanker-tracter trailers. Stained areas were noted on the property. A PEA is required due to the evidence onsite contamination. Database verification project confirms NFA for DTSC.

RCRAInfo Corrective Action Summary:

Event: CA Prioritization, Facility or area was assigned a high corrective action priority.  
Event Date: 06/09/1998  
Event: Current Human Exposures under Control, More information is needed to make a determination.  
Event Date: 06/09/1998  
Event: Igration of Contaminated Groundwater under Control, Unacceptable migration of contaminated groundwater is observed or expected.  
Event Date: 06/09/1998  
Event: Stabilization Construction Completed  
Event Date: 06/01/1996  
Event: RFI Imposition  
Event Date: 11/21/1994  
Event: Stabilization Measures Implemented, Primary measure is source removal and/or treatment (e.g., soil or waste excavation, in-situ soil treatment, off-site treatment).  
Event Date: 11/21/1994  
Event: Stabilization Measures Evaluation, This facility is not amenable to stabilization activity because of a lack of technical data. An evaluation has been completed, but further data is necessary to determine stabilization measures, feasibility or appropriateness. This status should be changed when data becomes available.  
Event Date: 03/08/1993  
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.  
Event Date: 08/06/1992

**FINDS:**

Other Pertinent Environmental Activity Identified at Site:

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

California - Hazardous Waste Tracking System - Datamart

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**FINDS:**

Other Pertinent Environmental Activity Identified at Site:

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **FEDERAL RECORDS**

### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/19/2006	Source: EPA
Date Data Arrived at EDR: 05/05/2006	Telephone: N/A
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 05/05/2006
Number of Days to Update: 17	Next Scheduled EDR Contact: 07/31/2006
	Data Release Frequency: Quarterly

### **NPL Site Boundaries**

### **Proposed NPL: Proposed National Priority List Sites**

Date of Government Version: 04/19/2006	Source: EPA
Date Data Arrived at EDR: 05/05/2006	Telephone: N/A
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 05/05/2006
Number of Days to Update: 17	Next Scheduled EDR Contact: 07/31/2006
	Data Release Frequency: Quarterly

### **DELISTED NPL: National Priority List Deletions**

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/19/2006	Source: EPA
Date Data Arrived at EDR: 05/05/2006	Telephone: N/A
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 05/05/2006
Number of Days to Update: 17	Next Scheduled EDR Contact: 07/31/2006
	Data Release Frequency: Quarterly

### **NPL RECOVERY: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 05/23/2006
Number of Days to Update: 56	Next Scheduled EDR Contact: 08/21/2006
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **CERCLIS:** Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/01/2006	Source: EPA
Date Data Arrived at EDR: 03/21/2006	Telephone: 703-413-0223
Date Made Active in Reports: 04/13/2006	Last EDR Contact: 03/21/2006
Number of Days to Update: 23	Next Scheduled EDR Contact: 06/19/2006
	Data Release Frequency: Quarterly

## **CERCLIS-NFRAP:** CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 02/01/2006	Source: EPA
Date Data Arrived at EDR: 03/21/2006	Telephone: 703-413-0223
Date Made Active in Reports: 04/13/2006	Last EDR Contact: 03/21/2006
Number of Days to Update: 23	Next Scheduled EDR Contact: 06/19/2006
	Data Release Frequency: Quarterly

## **CORRACTS:** Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/15/2006	Source: EPA
Date Data Arrived at EDR: 03/17/2006	Telephone: 800-424-9346
Date Made Active in Reports: 04/13/2006	Last EDR Contact: 03/06/2006
Number of Days to Update: 27	Next Scheduled EDR Contact: 06/05/2006
	Data Release Frequency: Quarterly

## **RCRA:** Resource Conservation and Recovery Act Information

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/09/2006	Source: EPA
Date Data Arrived at EDR: 04/27/2006	Telephone: 800-424-9346
Date Made Active in Reports: 05/30/2006	Last EDR Contact: 04/27/2006
Number of Days to Update: 33	Next Scheduled EDR Contact: 06/26/2006
	Data Release Frequency: Quarterly

## **ERNS:** Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2005	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/12/2006	Telephone: 202-260-2342
Date Made Active in Reports: 02/21/2006	Last EDR Contact: 04/26/2006
Number of Days to Update: 40	Next Scheduled EDR Contact: 07/24/2006
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **HMIRS:** Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/31/2005	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 04/14/2006	Telephone: 202-366-4555
Date Made Active in Reports: 05/30/2006	Last EDR Contact: 04/14/2006
Number of Days to Update: 46	Next Scheduled EDR Contact: 07/17/2006
	Data Release Frequency: Annually

## **US ENG CONTROLS:** Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/21/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2006	Telephone: 703-603-8905
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 03/03/2006
Number of Days to Update: 56	Next Scheduled EDR Contact: 07/03/2006
	Data Release Frequency: Varies

## **US INST CONTROL:** Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/21/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2006	Telephone: 703-603-8905
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 03/03/2006
Number of Days to Update: 56	Next Scheduled EDR Contact: 07/03/2006
	Data Release Frequency: Varies

## **DOD:** Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2004	Source: USGS
Date Data Arrived at EDR: 02/08/2005	Telephone: 703-692-8801
Date Made Active in Reports: 08/04/2005	Last EDR Contact: 05/12/2006
Number of Days to Update: 177	Next Scheduled EDR Contact: 08/07/2006
	Data Release Frequency: Semi-Annually

## **FUDS:** Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 12/05/2005	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 01/19/2006	Telephone: 202-528-4285
Date Made Active in Reports: 02/21/2006	Last EDR Contact: 04/03/2006
Number of Days to Update: 33	Next Scheduled EDR Contact: 07/03/2006
	Data Release Frequency: Varies

## **US BROWNFIELDS:** A Listing of Brownfields Sites

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 04/26/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/27/2006	Telephone: 202-566-2777
Date Made Active in Reports: 05/30/2006	Last EDR Contact: 03/13/2006
Number of Days to Update: 33	Next Scheduled EDR Contact: 06/12/2006
	Data Release Frequency: Semi-Annually

### **CONSENT:** Superfund (CERCLA) Consent Decrees

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: 12/14/2004	Source: Department of Justice, Consent Decree Library
Date Data Arrived at EDR: 02/15/2005	Telephone: Varies
Date Made Active in Reports: 04/25/2005	Last EDR Contact: 03/13/2006
Number of Days to Update: 69	Next Scheduled EDR Contact: 07/24/2006
	Data Release Frequency: Varies

### **ROD:** Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 04/13/2006	Source: EPA
Date Data Arrived at EDR: 04/28/2006	Telephone: 703-416-0223
Date Made Active in Reports: 05/30/2006	Last EDR Contact: 04/05/2006
Number of Days to Update: 32	Next Scheduled EDR Contact: 07/03/2006
	Data Release Frequency: Annually

### **UMTRA:** Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 11/04/2005	Source: Department of Energy
Date Data Arrived at EDR: 11/28/2005	Telephone: 505-845-0011
Date Made Active in Reports: 01/30/2006	Last EDR Contact: 03/20/2006
Number of Days to Update: 63	Next Scheduled EDR Contact: 06/19/2006
	Data Release Frequency: Varies

### **ODI:** Open Dump Inventory

An open dump is defined as a disposal facility that does not comply with one or more of the Part 257 or Part 258 Subtitle D Criteria.

Date of Government Version: 06/30/1985	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/09/2004	Telephone: 800-424-9346
Date Made Active in Reports: 09/17/2004	Last EDR Contact: 06/09/2004
Number of Days to Update: 39	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

**TRIS:** Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2003	Source: EPA
Date Data Arrived at EDR: 07/13/2005	Telephone: 202-566-0250
Date Made Active in Reports: 08/17/2005	Last EDR Contact: 03/21/2006
Number of Days to Update: 35	Next Scheduled EDR Contact: 06/19/2006
	Data Release Frequency: Annually

**TSCA:** Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2002	Source: EPA
Date Data Arrived at EDR: 04/14/2006	Telephone: 202-260-5521
Date Made Active in Reports: 05/30/2006	Last EDR Contact: 04/12/2006
Number of Days to Update: 46	Next Scheduled EDR Contact: 07/17/2006
	Data Release Frequency: Every 4 Years

**FTTS:** FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 03/29/2006	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 04/26/2006	Telephone: 202-566-1667
Date Made Active in Reports: 05/30/2006	Last EDR Contact: 03/20/2006
Number of Days to Update: 34	Next Scheduled EDR Contact: 06/19/2006
	Data Release Frequency: Quarterly

**FTTS INSP:** FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

Date of Government Version: 03/31/2006	Source: EPA
Date Data Arrived at EDR: 04/26/2006	Telephone: 202-566-1667
Date Made Active in Reports: 05/30/2006	Last EDR Contact: 03/20/2006
Number of Days to Update: 34	Next Scheduled EDR Contact: 06/19/2006
	Data Release Frequency: Quarterly

**SSTS:** Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2004	Source: EPA
Date Data Arrived at EDR: 05/11/2006	Telephone: 202-564-4203
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 03/06/2006
Number of Days to Update: 11	Next Scheduled EDR Contact: 07/17/2006
	Data Release Frequency: Annually

**ICIS:** Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 02/13/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/21/2006	Telephone: 202-564-5088
Date Made Active in Reports: 05/11/2006	Last EDR Contact: 04/11/2006
Number of Days to Update: 20	Next Scheduled EDR Contact: 07/17/2006
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **PADS:** PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 12/27/2005	Source: EPA
Date Data Arrived at EDR: 02/08/2006	Telephone: 202-566-0500
Date Made Active in Reports: 02/27/2006	Last EDR Contact: 05/08/2006
Number of Days to Update: 19	Next Scheduled EDR Contact: 08/07/2006
	Data Release Frequency: Annually

## **MLTS:** Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/12/2006	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 04/26/2006	Telephone: 301-415-7169
Date Made Active in Reports: 05/30/2006	Last EDR Contact: 04/03/2006
Number of Days to Update: 34	Next Scheduled EDR Contact: 07/03/2006
	Data Release Frequency: Quarterly

## **MINES:** Mines Master Index File

Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

Date of Government Version: 02/09/2006	Source: Department of Labor, Mine Safety and Health Administration
Date Data Arrived at EDR: 03/29/2006	Telephone: 303-231-5959
Date Made Active in Reports: 05/30/2006	Last EDR Contact: 03/29/2006
Number of Days to Update: 62	Next Scheduled EDR Contact: 06/26/2006
	Data Release Frequency: Semi-Annually

## **FINDS:** Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/27/2006	Source: EPA
Date Data Arrived at EDR: 05/02/2006	Telephone: N/A
Date Made Active in Reports: 05/30/2006	Last EDR Contact: 04/03/2006
Number of Days to Update: 28	Next Scheduled EDR Contact: 07/03/2006
	Data Release Frequency: Quarterly

## **RAATS:** RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 03/06/2006
Number of Days to Update: 35	Next Scheduled EDR Contact: 06/05/2006
	Data Release Frequency: No Update Planned

## **BRS:** Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## STATE AND LOCAL RECORDS

### **AWP:** Annual Workplan Sites

Known Hazardous Waste Sites. California DTSC's Annual Workplan (AWP), formerly BEP, identifies known hazardous substance sites targeted for cleanup.

Date of Government Version: 08/08/2005  
Date Data Arrived at EDR: 08/29/2005  
Date Made Active in Reports: 09/21/2005  
Number of Days to Update: 23

Source: California Environmental Protection Agency  
Telephone: 916-323-3400  
Last EDR Contact: 04/05/2006  
Next Scheduled EDR Contact: 05/29/2006  
Data Release Frequency: Annually

### **CAL-SITES:** Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database.

Date of Government Version: 08/08/2005  
Date Data Arrived at EDR: 08/29/2005  
Date Made Active in Reports: 09/21/2005  
Number of Days to Update: 23

Telephone: 916-323-3400  
Last EDR Contact: 04/05/2006  
Next Scheduled EDR Contact: 05/29/2006  
Data Release Frequency: Quarterly

### **NFE:** Properties Needing Further Evaluation

This category contains properties that are suspected of being contaminated. These are unconfirmed contaminated properties that need to be assessed using the PEA process. PEA in Progress indicates properties where DTSC is currently conducting a PEA. PEA Required indicates properties where DTSC has determined a PEA is required, but not currently underway.

Date of Government Version: 08/08/2005  
Date Data Arrived at EDR: 08/29/2005  
Date Made Active in Reports: 09/21/2005

Number of Days to Update: 38	Next Scheduled EDR Contact: 05/29/2006
	Data Release Frequency: Quarterly

## **SCH:** School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 08/08/2005	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 08/29/2005	Telephone: 916-323-3400
Date Made Active in Reports: 10/06/2005	Last EDR Contact: 04/05/2006
Number of Days to Update: 38	Next Scheduled EDR Contact: 05/29/2006
	Data Release Frequency: Quarterly

## **TOXIC PITS:** Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995	Source: State Water Resources Control Board
Date Data Arrived at EDR: 08/30/1995	Telephone: 916-227-4364
Date Made Active in Reports: 09/26/1995	Last EDR Contact: 05/01/2006
Number of Days to Update: 27	Next Scheduled EDR Contact: 07/31/2006
	Data Release Frequency: No Update Planned

## **SWF/LF (SWIS):** Solid Waste Information System

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 03/13/2006	Source: Integrated Waste Management Board
Date Data Arrived at EDR: 03/15/2006	Telephone: 916-341-6320

## **WMUDS/SWAT:** Waste Management Unit Database

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

**DEED:** Deed Restriction Listing

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 04/04/2006	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 04/05/2006	Telephone: 916-323-3400
Date Made Active in Reports: 05/11/2006	Last EDR Contact: 04/05/2006

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **HAZNET:** Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

## EDR PROPRIETARY RECORDS

### **Manufactured Gas Plants:** EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### **CT MANIFEST:** Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Data Release Frequency: Annually

**Oil/Gas Pipelines:** This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

## **Electric Power Transmission Line Data**

Source: PennWell Corporation  
Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## **AHA Hospitals:**

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **Medical Centers: Provider of Services Listing**

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## **Nursing Homes**

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

## **Public Schools**

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

## **Private Schools**

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

## **Daycare Centers: Licensed Facilities**

Source: Department of Social Services

Telephone: 916-657-4041

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

UTM Y (Meters):	3809385.0
Elevation:	1199 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	34118-D5 NEWHALL, CA
Most Recent Revision:	1988

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Target Property County</u>	FEMA Flood <u>Electronic Data</u>
LOS ANGELES, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 0607290345C

Additional Panels in search area: 0650430345B  
0607290365C  
0607290480C  
0607290460C

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	NWI Electronic <u>Data Coverage</u>
NEWHALL	Not Available

## **HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile WSW
Site Name:	HASA CHEM INC
Site EPA ID Number:	CAD009656075
Groundwater Flow Direction:	GENERALLY W IN BOTH THE ALLUVIAL AND SAUGUS AQUIFERS.
Inferred Depth to Water:	approximately 52 feet.
Hydraulic Connection:	The site is underlain by a near-surface alluvial aquifer and the underlying Saugus aquifer that are separated by a relatively impermeable layer.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

\* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

### ROCK STRATIGRAPHIC UNIT

Era: Cenozoic  
System: Tertiary  
Series: Pliocene  
Code: Tpc *(decoded above as Era, System & Series)*

### GEOLOGIC AGE IDENTIFICATION

Category: Continental Deposits

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: PICO

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 8.40 Min: 7.90
2	14 inches	54 inches	stratified	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 8.40 Min: 7.90
3	54 inches	60 inches	stratified	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 8.40 Min: 7.90

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: clay loam  
sand  
gravelly - sand  
gravelly - sandy loam  
loamy sand  
loam  
silty clay loam

Surficial Soil Types: clay loam  
sand  
gravelly - sand  
gravelly - sandy loam  
loamy sand  
loam  
silty clay loam

Shallow Soil Types: loamy fine sand

Deeper Soil Types: loam  
coarse sand

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### **USGS 7.5' Digital Elevation Model (DEM)**

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

## HYDROGEOLOGIC INFORMATION

### **AQUIFLOW<sup>R</sup> Information System**

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### **Geologic Age and Rock Stratigraphic Unit**

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### **STATSGO: State Soil Geographic Database**

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### **SSURGO: Soil Survey Geographic Database**

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### **FEDERAL WATER WELLS**

#### **PWS: Public Water Systems**

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## **PWS ENF:** Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

## **USGS Water Wells:** USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## **STATE RECORDS**

### **California Drinking Water Quality Database**

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

## **OTHER STATE DATABASE INFORMATION**

### **California Oil and Gas Well Locations**

Source: Department of Conservation

Telephone: 916-323-1779

## **RADON**

### **State Database: CA Radon**

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

### **Area Radon Information**

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

### **EPA Radon Zones**

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## **OTHER**

### **Airport Landing Facilities:** Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

### **Epicenters:** World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

**California Earthquake Fault Lines:** The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## **1. INTRODUCTION AND INVESTIGATIVE SUMMARY**

Dokken Engineering has prepared this Initial Site Assessment (ISA) to identify and evaluate potential hazardous waste materials within the proposed boundaries of the Cross Valley Connector East project (The project). The project is located within the City of Santa Clarita in the County of Los Angeles, California.

Dokken Engineering consulted multiple sources to evaluate potential hazards within the project vicinity. Dokken Engineering searched agency database records for the project vicinity through Environmental Data Resources (EDR). The EDR records search identified business types located within the project study area likely to store, transfer, or utilize large quantities of hazardous materials. This information was obtained from records maintained by the State of California Department of Health, the Regional Water Quality Control Board, and other appropriate agencies. Since the area is known for oil speculation and production; Dokken Engineering contacted the State of California – Department of Conservation Division of Oil, Gas & Geothermal Resources. Dokken Engineering also reviewed property ownership and history via Real Quest Inc. Dokken Engineering contacted the State of California Environmental Protection Agency – Department of Toxic Substance Control (DTSC). Finally, Dokken Engineering consulted other engineering documents prepared for projects within the vicinity of the project. In addition to this report Dokken Engineering prepared a California Department of Transportation (Caltrans) standard Initial Site Assessment Checklist, included as Attachment A.

This report documents the findings of the site assessment activities. According to the data gathered the actual project site contains no known hazardous waste, or concern for hazardous waste contamination. The findings of this report have determined that there are two Areas of Potential Concern for the project.

1. The site is located within a known oil field. There are three known abandoned wells within ¼ mile of the project. There is no documented spill or contamination associated with any one of these wells. The Conclusions and Recommendations section of this report contains the recommended action for this Area of Potential Concern.
2. There is an active California Environmental Protection Agency Annual Workplan (AWP) site within ½ to 1 mile of the project limits. This site is known to contain hazardous contamination in both the soil underneath the site as well as a plume of hazardous contaminated groundwater. The CVCE project will not impinge upon these contaminated soils however there is a low potential that the contaminated groundwater may have migrated underneath the project site. The Conclusions and Recommendations section of this report contains the recommended action for this Area of Potential Concern.

## **2. PROJECT DESCRIPTION**

The proposed Cross Valley Connector East Project includes the construction of a new 6 lane roadway between Soledad Canyon Road and Bouquet Canyon Road in the City of Santa Clarita. This project will ultimately form part of the Cross Valley Connector to connect the Golden State Freeway (I-5) with the Antelope Valley Freeway (Highway 14). Figure 1 (Attachment B) shows the regional map of the area of the proposed project.

The project will extend Newhall Ranch Road from its intersection with Bouquet Canyon Road approximately two miles to the east, where it will connect with the proposed Golden Valley Road project that is currently under construction. The project area can be referenced in the vicinity map in Figure 2 (Attachment B). The project includes approximately two miles of new roadway and includes two new bridges. The first bridge is an approximately 100 ft long single span bridge over the historic Los Angeles Aqueduct water pipeline. The second bridge is a ~980 ft multi-

---

span bridge that crosses the Santa Clara River. The project typical section includes six mixed-use lanes with a 14 ft median, 5 ft sidewalks in both directions and a class-I bikeway on the southerly side of the CVC. Figure 3 (Attachment B) shows the proposed alignment of the proposed Cross Valley Connector.

The proposed location for the project (Site) is located in an undeveloped setting – the land is presently classified as vacant irrigated pasture and vacant dry fields. Figure 4 (Attachment B) contains photos that demonstrate the existing land uses at the project site. Attachment A – ISA Layout Exhibits contains exhibits that demonstrate the project footprint overlaid upon a current aerial photograph of the project site. The land immediately to the south of the proposed Newhall Ranch Road project is scheduled to be developed by the Newhall Land and Farming company.

In 1994 the Castaic Lake Water Agency (CLWA) constructed the Rio Vista Water Treatment Facility which included new raw and treated water lines located within the proposed alignment of Newhall Ranch Road. Attachment C ‘Exhibits’ includes layout exhibits of the proposed project; demonstrated in these exhibits is the layout of the Rio Vista Water Treatment Pipeline easement. During construction of these water lines CLWA performed rough grading that was intended to accommodate the future extension of Newhall Ranch Road including associated cut and fill slopes. This work included rough grading for the first 5,600 feet of the proposed alignment of Newhall Ranch Road.

### **3. PURPOSE**

Chapter 18 of the California Department of Transportation (Caltrans) document titled *Project Development Procedures Manual (1999)* states that “every project that includes excavation, structure demolition or modification, or the purchase of new right-of-way, will require an ISA to determine if known or potential hazardous waste is present within the project limits.” The work outlined below addresses the requirements specified in the *Project Development Procedures Manual* and Chapter 10 of the Department’s publication titled “Environmental Handbook Volume I” (2004).

- Performance of a limited visual reconnaissance to locate possible areas of contaminated surface soil or surface water, improperly stored hazardous materials, possible sources of polychlorinated biphenyls (PCBs), and potential risk of contamination from activities at the project area and adjacent properties.
- Review of available maps and environmental reports pertaining to the project area.
- Review of available regulatory agency databases in order to assess if violations or environmental problems exist, have existed, or are suspected to exist within a 1,000 foot radius of project study area that may be detrimental to the environmental integrity of the area. These databases list locations of known hazardous waste sites, landfills, and leaking underground storage tanks, permitted facilities that utilize underground storage tanks, and facilities that use, store or dispose of hazardous materials.
- Preparation of an ISA report documenting findings and providing recommendation regarding potential environmental impacts to the project area.

### **4. METHODOLOGY**

There were no limiting conditions such as: weather, facility access, physical obstruction, bodies of water, or other obstacles that limited or prevented the environmental site assessment investigation.

This scope of work followed by this assessment is designed to meet or exceed the standard practice set forth by the California Department of Transportation (Caltrans) and applicable

---

portions of the American Society for Testing and Materials (ASTM Designation: E1527-00 “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process”).

. The preparation of this ISA included the investigations listed below:

- Performance of an agency records search in order to identify all California certified hazardous waste sites within the project study area. Where problematic hazardous waste sites were identified within the project study area (via governmental records and/or the visual survey), the potential impacts to the project and subsequent procedures to determine the extent of contamination and remediation requirements were identified.
- Performance of an agency records search in order to identify business types located within the project study area that would be likely to store, transfer, or utilize large quantities of hazardous materials.
- Performance of a search and review of environmental and engineering reports & maps for sites within or adjacent to the project limits.
- Performance of property records search to determine historical and current land use for the site.
- Performance of a visual reconnaissance of the site and study area to evaluate possible environmental hazards that may impact the implementation of the proposed project.

## **5. BACKGROUND**

### **5.1. Historical and Current Land Usage**

Parcel Information:

Real Quest Inc. was consulted for property detail reports and parcel maps for all of the parcels that the project is located on as well as properties adjacent to the project. The parcel lines and project limits are located in Attachment D ‘Exhibits’. The proposed alignment of Newhall Ranch Road crosses over 3 existing parcels.

- a. APN # 2849-001-022 Owned currently by Newhall Land and Farming Company. This parcel is unused presently and is categorized as vacant irrigated pasture. This parcel has no identified previous owners to Newhall Land & Farming Company.
- b. APN # 2849-003-900 Owned currently by the Castaic Lake Water Agency (CLWA). A portion of this parcel is occupied by the CLWA Rio Vista Water Treatment Plant. The portion of this parcel that the proposed alignment of Newhall Ranch Road crosses over is comprised of vacant hillside pastureland.
- c. APN # 2849-002-017 Owned currently by the Newhall Land and Farming Company. This parcel is unused presently and is categorized as vacant field – dry. This parcel has no identified previous owners to Newhall Land & Farming Company.

In general the historical land uses for the project site was pasture and farm land. Portions of the Newhall Land and Farming Companies land were used for oil exploration in the past. There is a discussion of the abandoned oil wells located within the vicinity of the project in the database records search section of this document.

### **5.2. Site Geology and Hydrology**

Allen E. Seward Engineering Geology, Inc. prepared a Geologic and Geotechnical Report for the River Park development project which is immediately adjacent to the proposed

---

alignment of Newhall Ranch Road. Dokken Engineering used this report as a resource for Site geology and Hydrology.

Site geology:

The site is situated in the western Transverse Ranges geomorphic province in the western portion of the Soledad Basin just north of the San Gabriel fault zone. There is a thick accumulation of sedimentary rocks in this structural/depositional basin. The elevated portion of the site is underlain by accumulation of ancient river channel deposits deposited on a series of successively lower benches cut into the bedrock by the ancestral Santa Clara River.

Site hydrology:

According to AES Engineering Geology interpolation from current and historic data indicates that historic ground water level has risen to within 5 feet of existing ground surface along margins of the Santa Clara River. Ground water elevations measured during subsurface investigations ranged from 14.25 feet to 34 feet. Dewatering may locally be required to complete the necessary removals. It should be noted that the ground water table will fluctuate up and down in response to natural recharge and pumping requirements.

## 6. SITE RECONNAISSANCE

A representative of Dokken Engineering conducted a limited site reconnaissance survey on March 11, 2003. This survey determined that there are no apparent environmental hazards within the project limits. There was no visible or odoriferous evidence of current or historical hazardous waste dumping on the site. The project site is unused pasture and farmland with some miscellaneous trails and dirt paths that cross through the site. The photos in Figure 2 (Attachment B) demonstrate the general site conditions. The most notable non-natural feature within the project limits is the Los Angeles County Department of Water and Power aqueduct. This large above ground aqueduct is in a north-south alignment through the project site. In addition there are large power line transmission towers that cross the site in a north-south alignment as well. There was some miscellaneous debris within the site limits. This debris was not considered toxic. Beside the aqueduct and power transmission lines there are no existing buildings or structures within the project limits. The design of the project avoids both the aqueduct and transmission towers therefore there is no demolition of structures anticipated for this project.

## 7. AGENCY RECORD SEARCH

### 7.1. California Department of Conservation - Division of Oil, Gas and Geothermal Resources.

Dokken Engineering reviewed the California Department of Conservation -- Division of Oil, Gas and Geothermal Resources (DOGGR) oil field maps to determine if any oil exploration/production took place within the project limits. It was determined that there were three wells located within 2,000 feet of the project alignment. Dokken Engineering contacted the DOGGR to gather well files for each of these wells. The exhibit included in Attachment D -- 'Oil Well Locations' shows the approximate location of each well with respect to Newhall Ranch Road. These wells were pioneered in the late 1950's, of the three, one produced oil. These well files are included as **Appendix A** to this document.

#### Well Number 1 -- Union Oil Company 'Bonelli #2'

'Bonelli #2' was explored and abandoned in July of 1959 by the Union Oil Company. This well is approximately 900 feet from the project site. It was drilled to a maximum depth of 3,096 feet and was found to be dry (no oil). The well was immediately abandoned and

plugged according to DOGGR standards. DOGGR inspectors supervised the abandonment operation and there are no known spills or complaints associated with this well.

**Well Number 2 – Edward Lustgarten ‘Lucky Lusty #1’**

‘Lucky Lusty #1’ was explored in April of 1958 and found to produce oil. This well is approximately 800 feet from the project site. The records are unclear as to how much oil this well produced however it ceased production of oil in September of 1971. The well was abandoned in February of 1972 according to DOGGR standards. DOGGR inspectors supervised the abandonment operation and there are no known spills or complaints associated with this well.

**Well Number 3 – Edward Lustgarten ‘Lucky Lusty #3’**

‘Lucky Lusty #3’ was explored in February of 1960. This well is within 250 feet of the project site. It was drilled to a maximum depth of 3,200 feet and found to be dry (no oil). The well was abandoned in May of 1961 according to DOGGR standards. DOGGR inspectors supervised the abandonment operation and there are no known spills or complaints associated with this well. During construction the exact location of this well should be determined and marked by the contractor.

It does not appear that these wells have contributed to soil or groundwater contamination that will affect the project. However, these wells are considered an Area of Potential Concern. Since the project is within the proximity of known oil fields, there is the potential for unidentified or un-reported exploratory wells, the contractor should be cautioned of this potential. If groundwater is encountered during construction the water should be tested for contamination. Furthermore, the exact location of three abandoned oil wells should be determined during final design of the project, and these well locations should be made available to the Contractor during the bidding process. If any well identified above or unidentified is determined to be located within the construction limits it should be treated per DOGGR standards. DOGGR regulates construction/development over abandoned oil wells. Prior to grading or construction, the well casings should be located and exposed for inspection by DOGGR personnel. If the plans indicate that the existing ground elevations above the well are lowered, the DOGGR may require that the well is re-abandoned. The location of the closest known well, Lucky Lusty #3 is close to a ‘Fill’ section of the project and re-abandonment is not considered likely.

**7.2. Database Record Search**

Dokken Engineering consulted with EDR to obtain government records searches of any known hazardous waste sites, hazardous waste incidents, or hazardous waste generators within a 2-mile radius of the project site. Refer to **Appendix B** for a copy of the EDR report. The records search reviewed a number of agency database sources to determine whether there are any known hazardous waste sites in the vicinity of the project. The following Table 1, Databases Searched Summary, is a list of agencies, databases, and types of records consulted by EDR in its governmental records search.

**TABLE 1 – DATABASES SEARCHED SUMMARY**

**A) Federal ASTM Standard:**

<b>AGENCY</b>	<b>LIST</b>	<b>DESCRIPTION</b>

Database search results discussion:

The type of site as well as horizontal and relative vertical proximity to the project limits will determine the potential for a listed hazardous waste site to cause contamination within the project limits. It is important to first review the database results based upon the type and proximity of a listed site to determine whether further analysis is reasonably warranted.

**Zero to ¼ mile from project limits:**

Between 0 and ¼ mile from the project limits the tables above show that there are no listed sites within ¼ mile of the project limits (including the site itself).

**¼ to ½ mile from project limits:**

There are a total of four listed sites within ¼ to ½ mile of the project site. One site is listed twice once as a SWRCB HIST UST (hazardous material storage tank list) and as a County of LA HMS (hazardous material underground storage tank list for the County), the other two sites are listed as HMS sites.

1. Saugus Swap Meet/ Saugus Speedway (22500 W. Soledad Canyon Road). This site is listed twice, once as a SWRCB HIST UST and as an HMS (both cover the hazardous UST's), in this case the site has automotive fuel storage tanks. There are no spills or violations associated with this site, furthermore it is relatively lower in elevation to the project site. It is considered a low risk to the project.
2. Bonelli Phar Prod (22500 W. Soledad Canyon Road). This site is listed as a County of LA HMS site. The type and size of tank is unknown, however there are no violations associated with this site and it is at a relatively lower elevation to the project site and thus is considered a low risk to the project.
3. Santa Clarita Water Co. (22722 Soledad Canyon Road). This site is listed as a County of LA HMS site. The type and size of tank is unknown, however there are no violations associated with this site and it is at a relatively lower elevation to the project site and thus is considered a low risk to the project.

**½ to 1 mile from project limits:**

As the search radius widens the likelihood of listings increases dramatically. The EDR record search determined that there are a total of one hundred eighty seven listed sites within ½ to 1 mile of the project site. At this distance it is important to look at the type of site to determine potential risk of contamination to the project. For this range in distance from the project site ASTM 1527-00 mandates a search of three critical lists:

1. National Priority List (NPL) – There are no NPL sites within 2 miles of the project limits.
2. RCRA CORRACTS (CORRACTS) – There are two CORRACTS sites within ½ and 1 mile of the project limits – there are none between 1 and 2 miles of the project limits.
3. State Equivalent NPL (California EPA AWP) – There is 1 AWP site within ½ and 1 mile of the project limits – there are no AWP sites between 1 and 2 miles of the project limits. This single site is located on both the CORRACTS list and the AWP list.

**CORRACTS Sites:** This list contains handlers with RCRA Corrective Action Activity.

1. American Cyanamid (21444 Golden Triangle Road)  
The American Cyanamid site was located on 17 different agency lists. This site is approximately 0.91 mile East / Southeast from the project limits. The site is at a relatively higher elevation than the project site at an elevation of 1,238 feet (the project site elevation is 1,222 feet). This site was identified on the CORRACTS list, the corrective action

---

summary for this site indicates that the last activity was on 09/15/1991 – on this date the facility was assigned a low corrective action priority. Further investigation indicates that this site was placed on the CERCLIS-NFRAP list. NFRAP (no further remedial action planned) are sites where; following initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. According to the RCRAInfo database the site achieved compliance with all federal actions on June 8, 1994. The site has been occupied by the Simply Discount Furniture store since 1995. Based upon the regulatory status and distance from the project limits, this site is not considered a risk for project site contamination.

2. Whittaker Bermite (22116 West Soledad Canyon Road)

The Whittaker Bermite site was located on 16 different agency lists including the California EPA AWP list). The site is approximately 0.56 mile south from the project limits. This site is at a relatively lower elevation than the project site at an elevation of 1,205 feet (17 feet below the project site). This 976 acre site was owned by a manufacturer of fireworks, explosives, rockets and munitions from 1906 to 1987. The manufacture of rocket propellants, fireworks and explosives is known to use Ammonium Perchlorate (Perchlorate). Perchlorate is an inorganic chemical that interferes with the ability of the thyroid gland to produce thyroid hormones. Thyroid hormones are critical to the normal growth and development of the central nervous system of fetuses and infants (source US EPA). The Whittaker-Bermite site is known to be contaminated with Perchlorate. This large site has been subdivided into multiple ‘Operable Units’ (OU’s). Several of these OU’s have undergone soil remediation cleanup activity for the purpose of opening these sites to municipal uses such as a new transit station and school.

Dokken Engineering contacted the California Department of Toxic Substance Control (DTSC) Site Remediation project manager Jose Diaz to assess the risk to the CVCE project from the Bermite site. Dokken Engineering was directed to the US Army Corps of Engineers (ACOE) website to view the Eastern Santa Clara Subbasin Groundwater study Conceptual Hydrogeology Technical Memorandum prepared by CH2MHill for the ACOE. To summarize this report, groundwater in the area is moves in a general west-northwest from the site, approximately parallel to the San Gabriel fault. There are ongoing studies of the extent and potential treatment of groundwater contamination; there is a website dedicated to the remediation of this site ([www.bermite.com](http://www.bermite.com)) The observed levels of Perchlorate contamination lessen with the distance from the Whittaker Bermite site. Furthermore, the levels of contamination appear to lessen at a more rapid rate north of the Whittaker Bermite site.

The Whittaker Bermite site is considered to be an Area of Potential Concern. Though low, there is the potential of encountering contaminated groundwater when constructing the proposed bridge structures. If groundwater is encountered during construction the DTSC should be notified and the water should be tested for contamination. It is recommended that construction techniques that minimize or eliminate the need for groundwater extraction be applied to the design of these bridges. It is further recommended that the groundwater and soils in proximity to the proposed bridge structures be tested for contamination during the final design of the project.

## 8. CONCLUSIONS AND RECOMMENDATIONS

Based upon the data reviewed in preparation of this report, Dokken Engineering have determined two Areas of Potential Concern that may contribute to groundwater and subsurface soil

---

contamination within the project limits. The following are recommendations for the proposed construction project.

- The exact location of three abandoned oil wells should be determined during final design of the project, and these well locations should be made available to the Contractor during the bidding process.
- If any well is determined to be located within the construction limits (known wells during final design, or un-identified wells during construction) it should be treated per DOGGR standards. DOGGR regulates construction/development over abandoned oil wells. Prior to grading or construction, the well casings should be located and exposed for inspection by DOGGR personnel.
- The projects structural design should consider construction practices that eliminate or minimize the need for de-watering. The groundwater and soils in proximity to the proposed bridge structures should be tested for contamination during the final design of the project. If the groundwater or soil is found to be contaminated, this contamination should be addressed in the plans and specifications for the project. If dewatering activities are required for the project, a discharge permit from the city, county, and/or state will be needed. The discharge permit will require the collection and analysis of groundwater samples prior to discharge. If contaminated soil and/or groundwater are encountered during the proposed project, the responsible party (e.g., property owner or operator) is liable for the contaminated soil or groundwater. If the contaminated soil or groundwater is transported from the site, the parties involved in removing the contaminated soil/groundwater will incur liability for the proper handling, storage and disposal of the material. These parties then have the potential to recover costs associated with the handling, storage and disposal of the contaminated soil or groundwater from the parties responsible for the contamination.
- Regardless of the findings related to the final design groundwater & soil contamination study or the oil well location study. The project's estimate should include a contingency associated with the removal and or treatment of contaminated soils, groundwater and re-abandonment of oil wells.
- A Site Safety Plan, which addresses the management of potential health and safety hazards to workers and the public, should be prepared and implemented prior to initiation of the proposed construction activities.

## **9. LIMITATIONS**

This report was prepared for City of Santa Clarita for the Cross Valley Connector East project. The information in this document is solely for the use of the City of Santa Clarita, this information can not be reproduced without written consent from Dokken Engineering and the City of Santa Clarita. Dokken Engineering makes no warranty, expressed or implied, concerning the contents or recommendations contained in this report.

This report is issued with the understanding that it is the responsibility of the City of Santa Clarita to ensure that the information and recommendations contained herein are brought to the attention of the regulatory agencies, if required.

---

All Areas of Potential Concern are based upon known (documented) sites. There is the potential for unknown (un-documented) environmental hazards within the project limits and adjacent to the project to negatively affect the site. All opinions and recommendations of this report are based upon the information available to Dokken Engineering; over time, through natural or human influences, site conditions may change. Specifically in reference to sub-surface conditions; the report is limited to information gathered from outside parties, and is limited by the accuracy of the data contained in those references. Therefore, the findings of this report may be invalidated by changes, such as those mentioned above, that are outside the control of Dokken Engineering and EDR.

# INITIAL SITE ASSESSMENT (ISA) CHECKLIST

## Project Information

District 7 County Los Angeles Route Newhall Ranch Rd/Golden Valley Rd Km Post (Post Mile) N/A EA N/A

Description: The project would involve the extension of two roadways, Newhall Ranch Road and Golden Valley Road, in the City of Santa Clarita (Figures 1 and 2(Attachment B)). Newhall Ranch Road would be extended by approximately 2.0 miles to the east of Bouquet Canyon Road. The new segment of Golden Valley Road would extend approximately 2,000 feet north of Soledad Canyon Road, where it would connect with the proposed Newhall Ranch Road. The proposed typical section of the alignment would include a six-lane roadway of approximately 120 feet in width, with a 14-foot median island and pedestrian and bicycle lanes (Figure 3(Attachment B)). The proposed Golden Valley Road segment would require the construction of a bridge across the Santa Clara River and would traverse undeveloped open space (e.g., vacant lot, natural riverbed, scrub habitat) parallel to an overhead power line corridor. The proposed roadways are included as Major Arterial Highways in the City's General Plan.

Is the project on the HW Study Minimal-Risk Projects List (HWI)? No

Project Manager Hoon Hahn phone # (661) 255-4953

Project Engineer Jason Lemons phone # (858) 514-8377

## Project Screening

Attach the project location map to this checklist to show location of all known and/or potential HW sites identified.

1. Project Features:
 

New R/W?	<u>Yes</u>
Excavation?	<u>Yes</u>
Railroad Involvement?	<u>No</u>
Structure demolition/modification?	<u>No</u>
Subsurface utility relocation?	<u>No</u>
  
2. Project Setting: Located in the Santa Clarita Valley north of the intersection of Interstate-5 and State Route 14, north of Soledad Canyon Road, and east of Bouquet Canyon Road. Crosses the Santa Clara River on the east end.

Rural or Urban: Rural

Current land uses: The land is undeveloped. There are some graded dirt access roads that cross the site. (Figure 4(Attachment B)).

Adjacent land uses: Community Commercial, Open Space, Commercial Office, Residential Moderate, and Industrial Commercial.
  
3. Check federal, State, and local environmental and health regulatory agency records as necessary, to see if any known hazardous waste site is in or near the project area. If a known site is identified, show its location on the attached map and attach additional sheets, as needed, to provide pertinent information for the proposed project. See SECTION 7.2 Data Base Records

search of the attached Initial Site Assessment.

4. Conducted Field Inspection. Date: March 11, 2003.

## Initial Site Assessment (ISA) Checklist

(continued)

STORAGE STRUCTURES / PIPELINES: None within grading limits, only in surrounding area

Underground tanks	<u>4 (within ¼ mile of project)</u>	Surface tanks	<u>0</u>
Sumps	<u>0</u>	Ponds	<u>0</u>
Drums	<u>0</u>	Basins	<u>0</u>
Transformers	<u>0</u>	Landfill	<u>1 (½ mile east of project)</u>
Other	<u></u>		

CONTAMINATION: (spills, leaks, illegal dumping, etc.)

Surface staining none Oil sheen none

Odors none Vegetation damage in areas scattered with trash or concrete

Other A minimal amount of trash is scattered across entire site

HAZARDOUS MATERIALS: (asbestos, lead, etc.) No structures on site.

Buildings	<u>--</u>	Spray-on fireproofing	<u>--</u>
Pipe wrap	<u>--</u>	Friable tile	<u>--</u>
Acoustical plaster	<u>--</u>	Serpentine	<u>--</u>
Paint	<u>--</u>	Other	<u>--</u>

5. A database search by Environmental Data Resources, Inc. (EDR) was performed on June 10, 2004 with selected updates in October 2005. The search results and corresponding map are attached.
6. Other comments and/or observations: Castaic Lake Water Agency (CLWA) operates a number of water monitoring stations along the proposed roadway. CLWA also operates a water pipeline that runs parallel to the Newhall Ranch Road portion of the roadway.

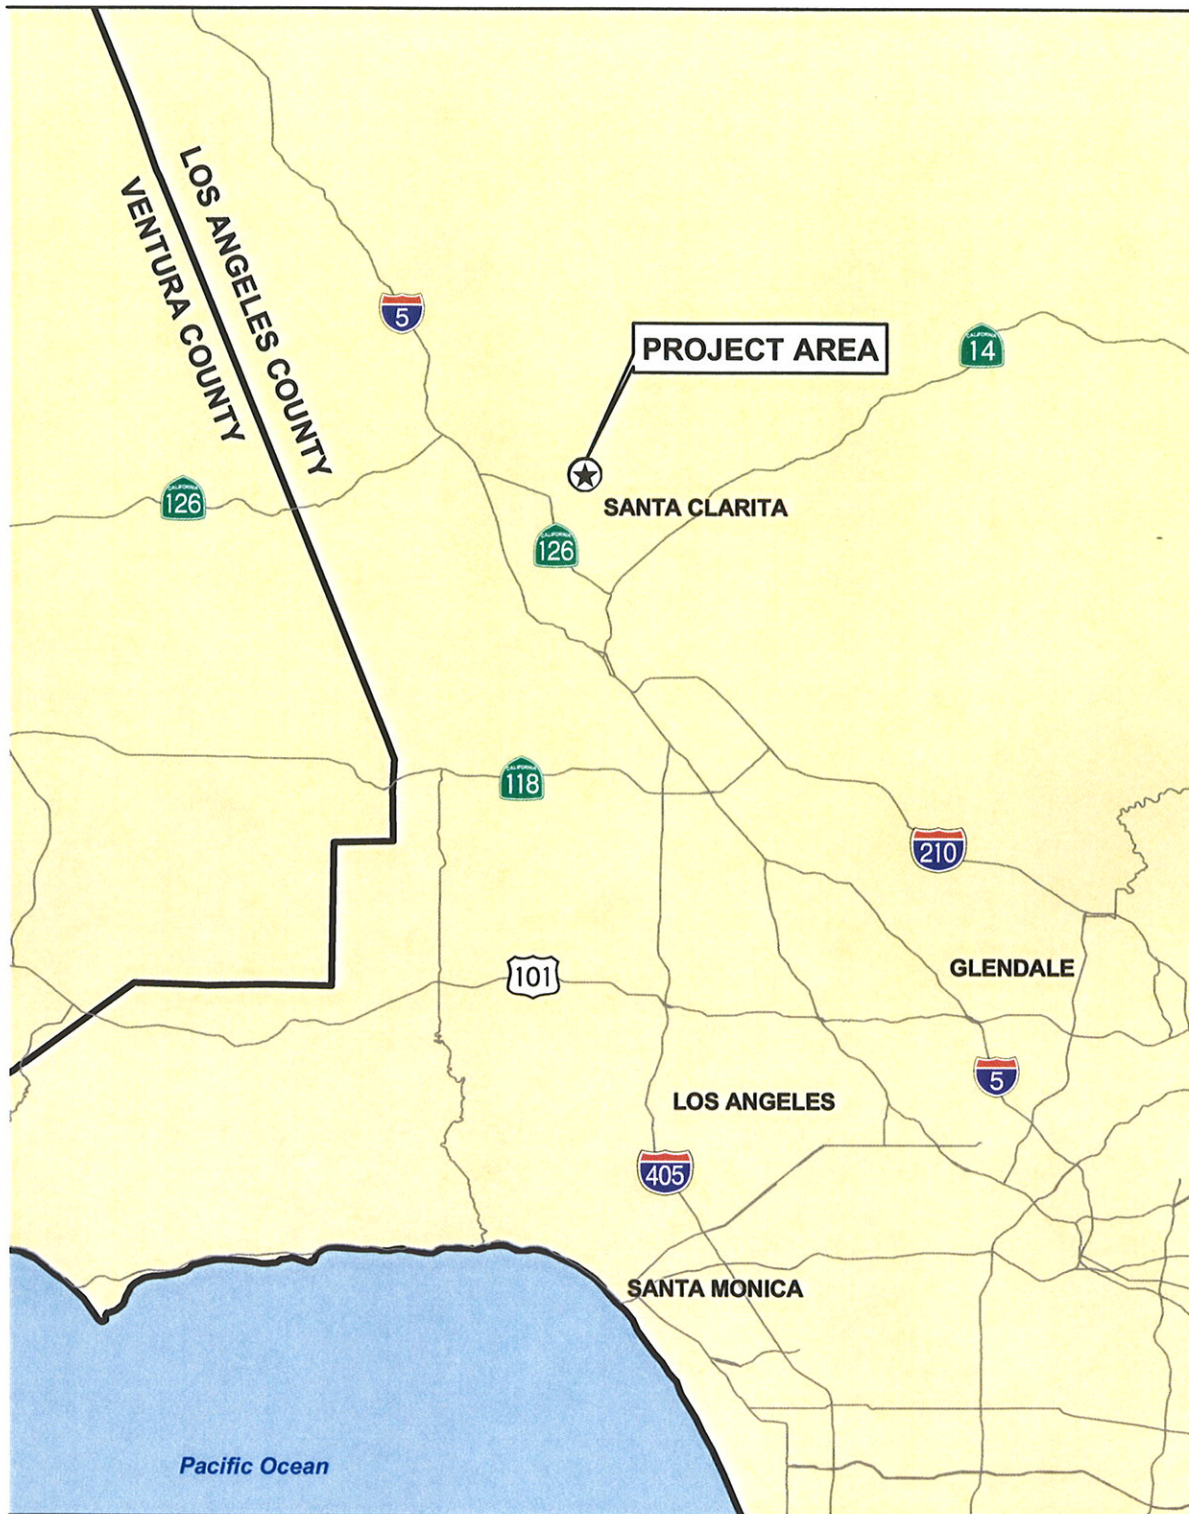

### ISA Determination

Does the project have potential hazardous waste involvement? **Yes, there is the potential for hazardous waste involvement, there is no known hazardous waste within the project limits.** If there is known or potential hazardous waste involvement, is additional ISA work needed before task orders can be prepared for the Investigation? **NO** If "YES," explain; then give an estimate of additional time required: The conclusions and recommendations section of the attached report (Section 8) suggests that additional work related to the findings of this document be done during the final design phase

A brief memo should be prepared to transmit the ISA conclusions to the Project Manager and Project Engineer.

AND GEOTHERMAL RESOURCES – WELL FILES**

**Chris Segur**

---

**From:** Fields, Steve [Steve.Fields@conservation.ca.gov]  
**Sent:** Wednesday, September 28, 2005 1:03 PM  
**To:** Chris Segur  
**Subject:** RE: Well Files

(805) 654-4761

Attached are copies of well files for your review.

In doing any environmental report concerning any property that has wells on please refer to our web site concerning construction site reviews.

[http://www.consrv.ca.gov/DOG/general\\_info/construction\\_site\\_review.htm](http://www.consrv.ca.gov/DOG/general_info/construction_site_review.htm)

**To:** Fields, Steve  
**Subject:** Well Files

Steve,

I just talked with you about well a well file request. The wells I needed information are:

(API)

03701116

03701117

03701121

Any information you have about these wells would be greatly appreciated.

Thanks,  
Chris Segur

GRAY DAVIS  
GOVERNOR

April 24, 2003

Leticia Cardoso  
PSOMAS  
28470 Avenue Stanford  
Suite 300 Building B  
Santa Clarita, CA 91355

Dear Ms. Cardoso:

This Division has received your request for the review of Tentative Tract 53425. In order to conduct our review, all wells on the project site have to be physically located and surveyed in and plotted on plot plans. Upon locating each well, this Division must be contacted to determine if the well is "leaking". In the event that any of the wells are "leaking" then remedial action will be required. In the event that any "construction" is proposed that will impede access to the well, then the well must be plugged and abandoned to current standards. "Impeding access" is defined as the ability to move in oilfield equipment (10 feet x 10 feet x 50 feet and open) in the future to perform remedial work or the placement of fill at depths greater than 10 feet. In addition, any well that is within 10 feet of a structure, we will recommend to the local permitting agency that a vent system be installed on the well. However, any construction site under the jurisdiction of Los Angeles County requires gas mitigation measures if a well is within 25 feet of a structure.

In order to complete our review, we require that three copies of the plot plan showing with all wells plotted, signed as being true and correct by a licensed surveyor or civil engineer with all required well work completed and associated records on work performed on each well and if gas mitigation approvals are required, they must be obtained and submitted.

If you have any questions, please contact me at (805) 654-4761.

RESOURCES AGENCY OF CALIFORNIA  
DEPARTMENT OF CONSERVATION

DIVISION OF OIL AND GAS

Report on Operations

No. T 172-1435

Mr. Edward Lustgarten, Agent  
EDWARD LUSTGARTEN  
16561 Ventura Blvd.  
Encino, CA 91316

Long Beach, Calif.  
Dec. 26, 1972

DEAR SIR: (037-01116)

Operations at well No. "Lucky Lusty" 1, Sec. 14, T. 4N, R. 16W, S.B. B & M.  
Bouquet Canyon Field, in Los Angeles County, were witnessed  
on Dec. 15, 1971 Mr. G. Ledingham, Engineer, representative of the supervisor was  
present from 0900 to 1100. There were also present W. Kirk, Operator and  
W. Bendley, Contractor.

Present condition of well: 12-3/4" cem. 150'; 7" cem. 2435', perf. 2336' WSO, perfs. at  
intervals 2344'-2414'; 5-1/2" cem. 2305'-2715', perfs. 2422'-2709'. T.B. 2982',  
plugged with cement 2678'-2250'+, and 25' to the surface.

The operations were performed for the purpose of witnessing the plugging operations in the  
process of abandonment.

Mr. --- reported:

Notice of Intention to Deepen, Redrill, Plug or Alter ~~Casing in Well~~ <sup>INGLEWOOD, CALIFORNIA</sup>

This notice must be given before work begins; one copy only

Harbor City Calif. September 17 1971

DIVISION OF OIL AND GAS

Inglewood Calif.

In compliance with Section 3203, Chapter 93, Statutes of 1939, notice is hereby given that it is our intention to commence the work of deepening, redrilling, plugging or altering casing at Well No. Lucky Lusty No. 1  
(Cross out unnecessary words)

Sec. 14, T. 4N, R. 16W, S B B. & M.  
Bouquet Canyon area Field, Los Angeles County.

The present condition of the well is as follows:

- 1. Total depth.  
2470' plugged back from 2982'.
- 2. Complete casing record, including plugs:  
12-3/4" to 150'  
7" to 2435'  
Gun perforated 2344' to 2414'

3. Last produced. 9-5-71 1 39  
(Date) (Net Oil) (Gravity) (Cwt)

The proposed work is as follows:

Plug and abandon.

It is of the greatest importance to have a complete history of the well. Use this form to report a full account of all important operations during the drilling and testing of the well or during re-drilling, altering of casing, plugging, or abandonment with the dates thereof. Be sure to include such items as hole size, formation test details, amounts of cement used, top and bottom of plugs, perforation details, sidetracked junk, bailing tests, shooting and initial production data.

- | Date    | Description  |
|---------|--|
| 2/21/58 | Started drilling operations, drilled <sup>17</sup> 11 5/8 inch hole to 150 ft., set <sup>12 3/4"</sup> casing to surface with 35 sacks of cement. Resumed drilling with 9 7/8 inch hole to a depth of 1775' and cored to 1828', then continued drilling to a depth of 2982'. Ran electric log, and then set a plug at 2430' with 100 sacks of cement.          |
| 3/ 5/58 | Took a formation test, but Johnson formation tester failed to open. Suspended operation on 3/6/58.   |
| 4/ 7/58 | Reamed hole to 2437', landed 7" casing <sup>at 2435</sup> with 400 sacks of cement, plus additional lite aggregate, ran WOS test at 2335-37', and found less than one half of stand of fluid rise. Gun perforated intervals of 2344' to 2414', made swabbing test and put well on pump. Initial production approximately 39bbls of oil, and 20 bbls. of water. |
| 4/21/58 | Pulled rods and tubing, ran bailer and found shoe had been drilled out, and hole was open at bottom. <sup>to 2470</sup>  |
| 6/ 3/58 | Put in Baker Bridging plug at 2423', put well back on pump, production of approximately 10 to 15 bbls. oil a day, cutting less than 10 percent.  |

Inglewood 3 Calif.  
April 17 1958

DEAR SIR:

Your supplementary proposal to drill Well No. "Lucky Lusty" 1,  
Section 14, T. 4 N., R. 16 W., S. B. B. & M., xxxx Field, Los Angeles County,  
dated April 11, 1958, received April 11, 1958, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

## THE NOTICE STATES

"The present condition of the well is as follows:  
Total depth. 2986', plugged with cement 2520'-2440'

Complete casing record.  
12-3/4" cem. 150'."

## PROPOSAL

"We now propose

1. Cement 7" casing at 2440' with sufficient cement to fill back of the 7" casing to 850'.
2. Demonstrate water shut-off at 2320'  $\frac{1}{2}$ .
3. Gun-perforate selected intervals between 2325' and 2430', and test for production."

## DECISION

THE PROPOSAL IS APPROVED PROVIDED THAT THIS DIVISION SHALL BE NOTIFIED TO WITNESS a test of the effectiveness of the 7" shut-off at 2320'  $\frac{1}{2}$ .

GRAY DAVIS  
GOVERNOR

April 24, 2003

Leticia Cardoso  
PSOMAS  
28470 Avenue Stanford  
Suite 300 Building B  
Santa Clarita, CA 91355

Dear Ms. Cardoso:

This Division has received your request for the review of Tentative Tract 53425. In order to conduct our review, all wells on the project site have to be physically located and surveyed in and plotted on plot plans. Upon locating each well, this Division must be contacted to determine if the well is "leaking". In the event that any of the wells are "leaking" then remedial action will be required. In the event that any "construction" is proposed that will impede access to the well, then the well must be plugged and abandoned to current standards. "Impeding access" is defined as the ability to move in oilfield equipment (10 feet x 10 feet x 50 feet and open) in the future to perform remedial work or the placement of fill at depths greater than 10 feet. In addition, any well that is within 10 feet of a structure, we will recommend to the local permitting agency that a vent system be installed on the well. However, any construction site under the jurisdiction of Los Angeles County requires gas mitigation measures if a well is within 25 feet of a structure.

In order to complete our review, we require that three copies of the plot plan showing with all wells plotted, signed as being true and correct by a licensed surveyor or civil engineer with all required well work completed and associated records on work performed on each well and if gas mitigation approvals are required, they must be obtained and submitted.

If you have any questions, please contact me at (805) 654-4761.

## Report on Test of Water Shut-off

(FORMATION TESTER)

No. T160-135

Mr. Edward Lustgarten  
10700 Wilshire Blvd.  
Los Angeles 24, California  
Agent for EDWARD LUSTGARTEN

Inglewood 3, Calif.  
March 4, 1960

DEAR SIR:

Your well No. "Lucky Lusty" 3, Sec. 14, T. 4 N., R. 16 W., S.B.B & M.  
Field, in Los Angeles County, was tested for water shut-off  
on March 1, 1960. Mr. W. Hunter, Engineer, designated by the supervisor was present  
from 7:00 p.m. to 9:30 p.m. as prescribed by law; there were also present G. Atha, Engineer  
D. Jackson, Drilling Foreman

Shut-off data: 7 in. 20 & 23 lb. casing was cemented through perforations at 2410 ft.  
on February 28, 1960 in 9-7/8 in. hole with 450 sacks of cement,  
the last 150 sacks treated with 2% CaCl<sub>2</sub>

calculated to fill behind casing to 440 ft. below surface.  
Casing record of well: 10-3/4" cem. 125'; 7" ld. 2526', perms 2412'-2526', c.p. 2410', perf.  
2385', W.S.O., plugged with cement 2887'-2630'.

Present depth 3200 ft. cmt. bridge 2410 ft. to 2405 ft. Cleaned out cmt 2366 ft. to 2405 ft. for test.  
A Halliburton gun and tester was run into the hole on 2-7/8 in. drill pipe tubing,  
with ~~xxxx~~ ft. of water-mud cushion, and packer set at 2335 ft. with tailpiece to 2358 ft.  
Tester valve, with 5/8 in. bean, was open for one hr. and ~~xxxx~~ min. During this interval there was a  
medium blow decreasing to weak in five minutes, and no blow thereafter.

Mr. Atha reported:

1. A 10-3/4" casing was cemented at 125'.
2. A 9-7/8" hole was drilled from 125' to 3200'.
3. On February 27, 1960, 150 sacks of cement was pumped into the hole through 4-1/2" drill pipe hanging at 2887' and filling to 2630'.
4. The 7" casing was jet-perforated with four, 1/2" holes at 2385'.

## THE ENGINEER NOTED

1. When the tubing was removed, 20' of thin drilling fluid was found above the tester.
2. The pressure bomb chart indicated that the tester tool functioned properly.

THE 7" SHUT-OFF AT 2385' IS APPROVED.

No. T159-603

Mr. C. F. Bowden  
P.O. Box 7600  
Los Angeles 54, Calif.  
Agent for UNION OIL COMPANY OF CALIFORNIA

Inglewood 3, Calif.  
July 21, 1959

DEAR SIR:

Operations at your well No. "Bonelli" 2, Sec. 14, T. 4 N., R. 16 W., S. B. B & M. Field, in Los Angeles County, were witnessed on July 13, 1959. Mr. W. Hunter, Engineer, representative of the supervisor was present from 7:30 p.m. to 12:00 p.m. There were also present W. Eklund, Engineer, L. Melton, Drilling Foreman.

Present condition of well: 11-3/4" cem. 315', T.D. 3096'; plugged with cement 830'-774' $\frac{1}{2}$ , 580'-368', 340'-226'

The operations were performed for the purpose of witnessing the plugging operations in the process of abandonment.

Mr. Eklund reported:

1. A 9-7/8" hole was drilled from 315' to 3096'.
2. On July 13, 1959, 25 sacks of cement (calculated to fill to 774') was pumped into the hole through 3-1/2" drill pipe hanging at 830'.
3. On July 13, 1959, 211 sacks of cement was pumped into the hole through 3-1/2" drill pipe hanging at 580'.

THE ENGINEER NOTED THAT

1. The cement plug was located at 368'.
2. One hundred sacks of cement (treated with 2% CaCl<sub>2</sub>) was pumped into the hole through 3-1/2" drill pipe hanging at 340'.
3. The cement plug at the reported depth of 226' supported two points of the weight of the drill pipe.

THE PLUGGING OPERATIONS AS WITNESSED AND REPORTED ARE APPROVED.

**Notice of Intention to Abandon Well**

This notice must be given at least five days before work is to begin; one copy only

INGLEWOOD, CALIFORNIA

Santa Paula Calif. July 13 1959

DIVISION OF OIL AND GAS

In compliance with Division 3, Public Resources Code, notice is hereby given that it is our intention to abandon

Well No. \_\_\_\_\_ Bonelli No. 2 \_\_\_\_\_, Sec. 14, T. 4N,

R. 16W, S.B. B. & M., Saugus Field, Los Angeles County,

commencing work on July 13 1959.

THE PRESENT CONDITION OF THE WELL IS:

1. Total Depth: 3096'
2. Complete casing record, including plugs:

11-3/4" C 315'

3. Last Produced \_\_\_\_\_  
(Date) (Oil, B/D) (Water, B/D)

ADDITIONAL DATA FOR DRY HOLE

4. Oil or Gas showings and results of tests:

Minor shows @ 810-830'. Did not warrant testing.

5. Stratigraphic markers and depths:

Base of Saugus - 500'.

6. Geologic age at bottom: Mint. Cyn. formation
7. Base of fresh water sands: 530'

THE PROPOSED WORK IS

1. Plug at 830' with 25 sax.
2. Plug at 580' with 280 sax. Top of plug to be above 295'. Division of Oil and Gas to witness location and hardness of plug.
3. Plug top 10' of 11-3/4" casing with cement. Weld 1/4" steel plate on top of 11-3/4" casing. Notify Division of Oil and Gas upon completion.

*Abandon*

(Name) (Depth, top and bottom)

Estimated total depth 3000'

It is understood that if changes in this plan become necessary we are to notify you before running casing."

DECISION

THE PROPOSAL IS APPROVED PROVIDED THAT

1. Mud fluid consistent with good drilling practice shall be used, and the column of mud fluid maintained at all times to the surface, particularly while pulling the drill pipe
2. Adequate blowout prevention equipment shall be installed and maintained in operating condition at all times.
3. Sufficient cement shall be used to fill all the space back of the 7" casing to above top of any oil-, gas-, or salt water-bearing formations, or the casing shall also be cemented through ports at a point below the base of the fresh water-bearing formations with sufficient cement to fill to above such base. This Division shall be consulted regarding <sup>cementing</sup> depths prior to running the 7" casing into the hole.
4. THIS DIVISION SHALL BE NOTIFIED AS FOLLOWS:
  - (a) To inspect the installed blowout prevention equipment before drilling below 1000'.
  - (b) To witness a test of the the effectiveness of the 7" shut-off.

Eastern Santa Clara Subbasin Groundwater Study  
Santa Clarita, California

**Executive Summary:**

**ES.1 Introduction**

This Conceptual Hydrogeology Technical Memorandum (TM) presents the data and findings obtained between October 2002 and April 2004 as part of the Site Characterization Phase of the Eastern Santa Clara Subbasin Groundwater Study (project), Santa Clarita, California (Figure ES-1). The study area includes the former Whittaker Corporation Bermite Facility (Site) and adjacent areas of the Santa Clarita Valley (Figure ES-2). The scope of work includes an evaluation of the nature and extent of regional groundwater impact from chemicals of interest (COIs), or preliminary chemicals of potential concern (COPCs), including perchlorate, in the study area. This work is performed under contract to the United States Army Corps of Engineers (USACE) "Civil Works" program, with Castaic Lake Water Agency (CLWA) as the nonfederal sponsor. On April 11, 2002, USACE entered into a Feasibility Cost-Sharing Agreement with CLWA, which represents the water purveyors in the eastern Santa Clarita Valley. The California Department of Toxic Substances Control (DTSC) is the lead regulatory agency.

The Site is located in the eastern Santa Clarita Valley, near the confluence of the Santa Clara River and the South Fork of the Santa Clara River, approximately 2 miles northeast of Newhall, in Los Angeles County, California (Figure ES-2). Santa Clarita, LLC

(SCLLC) is the current property owner. Previous operations at the Site included the manufacture, storage, and testing of a variety of explosives, munitions, and propellants. Releases of perchlorate, volatile organic compounds (VOCs), and other COIs associated with former operations have impacted soil and groundwater at the Site. Perchlorate and/or VOCs also have been detected in groundwater samples from four municipal water supply or production wells located west of the Site, SC-Saugus 1 and 2, NC-11, and V-157; and one located north of the Site, SC-Stadium (Figure ES-2).

The Site was previously divided into seven operable units (OUs) designated based on the location of known source areas, former Site operations, local surface watersheds, and the affected media. Groundwater impacted by Site operations was grouped into a single OU and designated as OU7. USACE characterization efforts have focused on assessing the nature and extent of impacted groundwater in the study area, which includes OU7 groundwater. The project is implemented under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) procedures. The results are intended to support the ongoing OU7 remedial investigation by Whittaker Corporation (Whittaker), and the CLWA response activities for impacted production wells. Whittaker is currently conducting various remedial investigations onsite and offsite under a Unilateral Order issued by DTSC on November 22, 2002: Imminent and Substantial Endangerment Determination and Order and Remedial Action Order. CLWA is the nonfederal cost-sharing sponsor of the project and is also conducting various work under a voluntary Environmental Oversight Agreement entered into with the DTSC. Under this agreement, DTSC is providing review and oversight of the response activities being taken by CLWA related to the detection of perchlorate at the five impacted production wells.

### **ES.2 Project Objectives**

The main objective of the project is to sufficiently characterize the existing groundwater conditions in the study area to develop and evaluate interim, if applicable, and long-term solutions to address perchlorate-impacted groundwater in the study area. The specific objectives for the site characterization activities are as follows:

- Obtain subsurface characterization data, specifically lithologic, hydraulic, and chemical data in the alluvium and Saugus Formation.
- Complete a baseline assessment of the groundwater quality in the study area.
- Complete additional rounds of groundwater sampling in the study area to confirm the results of the baseline assessment.
- Test for chemical parameters that affect the efficiency or applicability of various potential groundwater-treatment processes. (Note: These results are presented but will not be discussed further in this TM; they will be evaluated as part of water treatment/engineering feasibility studies.)

### **ES.3 Purpose and Scope of TM**

The purpose of this TM is to present the conceptual hydrogeology of the study area, which provides the fundamental framework for ongoing work in the eastern Santa Clarita Valley. It summarizes and evaluates the results of site characterization efforts completed by USACE between October 2002 and April 2004, focusing on the regional extent of impacted groundwater and potential contaminant migration pathways. This TM is not intended to be a comprehensive

treatise of all previous and ongoing site characterization efforts related to OU7; Whittaker will prepare an OU7 Remedial Investigation Report at a later date. In addition, the CLWA is concurrently preparing groundwater modeling and additional well characterization studies in support of the response activities for the impacted production wells.

#### **ES.4 Summary of Remedial Investigations**

USACE completed remedial investigations in two major phases between October 2002 and April 2004 (Tables ES-1 and ES-2). Below is a summary of the field activities conducted to meet the project objectives:

USACE completed remedial investigations in two major phases between October 2002 and April 2004 (Tables ES-1 and ES-2). Below is a summary of the field activities conducted to meet the project objectives:

- To obtain subsurface characterization data in the alluvium (Figure ES-3) and Saugus Formation (Figure ES-4):
  - Drilled a total of almost 8,500 linear feet, with the deepest monitoring well advanced to a depth of almost 1,600 feet.
  - Installed 41 monitoring wells at 11 different locations, including five deep multiport (MP) wells.
  - Advanced 17 temporary boreholes by the cone penetrometer testing (CPT) technique to optimally place the shallow alluvium wells, and collected groundwater samples from 10 of the 17 borings advanced.
  - Completed five groundwater sampling events and collected a total of 149 groundwater samples.
  - Collected water level/piezometric surface elevation data nine times.
  - Conducted aquifer testing that consist of slug tests at three MP wells and 3-day-long pumping tests at two production wells, V-205 and NC-13, while monitoring responses to the pumping at adjacent wells.
- To complete a baseline assessment of the groundwater quality in the study area, tested all the wells once initially for a "baseline" suite of analytes, totaling more than 200 parameters, that includes: perchlorate, VOCs, explosive compounds, nitrosamines, and other COIs (i.e., 1,4-dioxane, semivolatile organic compounds [SVOCs], chlorate, gross alpha and gross beta, cyanide, hexavalent chromium). They also were tested for metals (including major cations), major anions, alkalinity, total Kjeldahl nitrogen, nitrate, ammonia, total dissolved solids, biochemical oxygen demand, chemical oxygen demand, and total organic carbon.
- To confirm the results of the baseline assessment, conducted additional (two to four, depending on which phase the wells were first installed) groundwater sampling events. The wells were tested for a more focused suite of analytes during the subsequent sampling events.

To obtain subsurface characterization data in the alluvium (Figure ES-3) and Saugus Formation (Figure ES-4):

- Drilled a total of almost 8,500 linear feet, with the deepest monitoring well advanced to a depth of almost 1,600 feet.
- Installed 41 monitoring wells at 11 different locations, including five deep multiport (MP) wells.
- Advanced 17 temporary boreholes by the cone penetrometer testing (CPT) technique to optimally place the shallow alluvium wells, and collected groundwater samples from 10 of the 17 borings advanced.
- Completed five groundwater sampling events and collected a total of 149 groundwater samples.
- Collected water level/piezometric surface elevation data nine

times.

- Conducted aquifer testing that consist of slug tests at three MP wells and 3-day-long pumping tests at two production wells, V-205 and NC-13, while monitoring responses to the pumping at adjacent wells.

- To complete a baseline assessment of the groundwater quality in the study area, tested all the wells once initially for a "baseline" suite of analytes, totaling more than 200 parameters, that includes: perchlorate, VOCs, explosive compounds, nitrosamines, and other COIs (i.e., 1,4-dioxane, semivolatile organic compounds [SVOCs], chlorate, gross alpha and gross beta, cyanide, hexavalent chromium). They also were tested for metals (including major cations), major anions, alkalinity, total Kjeldahl nitrogen, nitrate, nitrite, ammonia, total dissolved solids, biochemical oxygen demand, chemical oxygen demand, and total organic carbon.

- To confirm the results of the baseline assessment, conducted additional (two to four, depending on which phase the wells were first installed) groundwater sampling events. The wells were tested for a more focused suite of analytes during the subsequent sampling events.

### **ES.5 Findings**

Based on the data collected during the project, the following findings are offered:

#### **Hydrostratigraphy**

- The study area conceptual hydrostratigraphic model was defined with 10 hydrostratigraphic units (HSUs) to provide a general framework to evaluate the groundwater flow conditions and the migration of COIs. The HSUs include the Quaternary Alluvium, eight HSUs south of the San Gabriel fault, and one Saugus HSU north of the San Gabriel fault; a simplified three-dimensional view of the conceptual hydrogeology is shown in Figure ES-5.

- The HSUs were defined based on hydraulic head data measured, observed pumping responses to Saugus Formation production well extraction, interpretation of geophysical and lithologic logs, and the results of the March 2004 Saugus Formation aquifer tests at production wells NC-13 and V-205.

#### **Aquifer Properties**

- Aquifer properties of the Saugus Formation were estimated from USACE testing. The transmissivity values for the Saugus Formation screened by local Saugus production wells range from 5,544 to 47,355 square feet per day (ft<sup>2</sup>/day), corresponding to bulk hydraulic conductivity (K) values of 3.5 to 34.3 ft/day. Estimated K values for HSUs SIII, SV, and SVII range from 1.9 to 18.8 ft/day, 1.0 to 23.1 ft/day, and 0.1 to 38.6 ft/day, respectively. The K values reported by USACE and other investigators for discrete lithologic intervals within the Saugus Formation vary by nearly three orders of magnitude, consistent with the heterogeneous nature of the Saugus Formation.

- The bulk K values reported for the Quaternary Alluvium are significantly larger than those for the Saugus Formation. The K values of the Quaternary Alluvium have been estimated by other investigators to be 550 ft/day in the Santa Clara River between the Site and Bouquet Junction, and 105 ft/day in the South Fork west of the Site.

#### **Groundwater Flow**

- Groundwater flows westward in the Quaternary Alluvium (Figure

ES-6) in the Santa Clara River and northward in the South Fork Santa Clara River. The horizontal hydraulic gradient is approximately 0.005 foot per foot (ft/ft) in the main reach, 0.0007 ft/ft in the South Fork, and 0.003 ft/ft downstream of the confluence of these drainage systems. Depending on the location, the vertical hydraulic gradients can be either upward (AL-4, approximately 0.07 ft/ft) or downward (at AL-9, 0.04 ft/ft).

- Groundwater in the Saugus Formation flows northwest in HSUs SI and SIII (Figures ES 7 and ES-8), subparallel to the trace of the San Gabriel fault, and west-southwest in HSU SVII (Figure ES-9). The average horizontal hydraulic gradient in HSUs SI, SIII, and SVII is approximately 0.001 ft/ft, 0.002 ft/ft, and 0.001 ft/ft, respectively. The horizontal gradient in HSU SIII is steeper northwest of MP-1 (0.004 ft/ft) than onsite (0.001 ft/ft), apparently due to the pumping influence from production wells V-205, V-201, and V-160. The westerly flow direction observed in HSU SVII may be due, in large part, to groundwater extraction at production wells NC-13 and NC-12. The groundwater flow direction in HSU SV is assumed to be toward the west, based on the similar pumping responses observed in HSUs SVII and SV.

- The direction of the vertical hydraulic gradient across the Saugus HSUs is generally downward, with the exception of the gradient between HSUs SVIII and SVII. Because little groundwater extraction occurs from HSU SVIII, the piezometric surface elevations are higher (greater than 100 feet) in HSU SVIII than in the overlying units. Gradient reversals between HSUs SV and SVII have occurred (as observed at MP-1); this phenomenon is likely a result of the combined extraction from production wells V-205, V-201, and V-160 being substantially larger than at production wells NC-12 and NC-13. The magnitude of the vertical gradients across the HSUs ranges from approximately 0.8 ft/ft to 0.02 ft/ft and varies seasonally with changes in Saugus Formation groundwater extraction.

#### **Water Quality**

- Although a large number of COIs, or potential COPCs, including perchlorate, VOCs, SVOCs, nitroaromatics and nitroamines (explosive compounds), and nitrosamines, were tested, perchlorate, trichloroethylene (TCE), and tetrachloroethylene (PCE) appear to be the primary COIs in groundwater in the study area (Table ES-3). Where TCE and PCE were detected, they generally occurred with perchlorate. Other analytes were detected; however, the detections were inconsistent and/or the concentrations were less than regulatory action levels.

- All three primary COIs (perchlorate, TCE, and PCE) were detected at concentrations that exceed their regulatory action levels onsite. The maximum concentrations of perchlorate (64,500) micrograms per liter [mg/L], TCE (2,000) mg/L, and PCE (10 mg/L) were detected at the same location (MP-2 Screen 1) onsite. Perchlorate and TCE were detected above their regulatory action levels offsite; PCE was detected at concentrations less than, but close to, its regulatory action level offsite.

- Perchlorate, TCE, and PCE were detected in the alluvium as far as Bouquet Junction, which is located approximately 1 mile west of the Site (Figure ES-10). Perchlorate was detected approximately 2,500 feet southwest of Bouquet Junction. The results are consistent with contaminant migration via the alluvium, where the COIs from onsite source areas appear to have migrated in the alluvium west from the Site along the southern margin of the Santa Clara River into the confluence of the Santa Clara River and the South Fork.

- Perchlorate also was detected in the alluvium in the South Fork as far south as the mouth of Oakdale Canyon, which drains major

onsite source areas (Figure ES-10). The results are consistent with contaminant migration via infiltration of impacted surface water runoff. Impacted groundwater appears to have migrated vertically into the Saugus Formation in this area and may have impacted NC-11. Whittaker implemented short-term measures to minimize perchlorate impacts to surface water during the 2003/2004 rainy season, and a feasibility study for the mitigation of perchlorate in surface water runoff is in progress and will be reported separately.

- Perchlorate was detected in the Saugus Formation onsite at MP-2 and offsite as far west as MP-5 (Figures ES-11 and ES-12). The distance between the two wells is more than 2 miles. The groundwater impact appears to be limited to the upper portion of the Saugus Formation. Available data suggest HSUs SI and SIII are impacted (maximum perchlorate concentration is 11.9 mg/L); this translates to approximately 200 feet of saturated thickness onsite and more than 900 feet deep offsite. The distribution of perchlorate concentrations at MP-2, MP-1, SC-Saugus 1, and V-157 is consistent with contaminant migration in HSU SIII via vertical downward migration of perchlorate through the Saugus Formation vadose zone and lateral migration away from the source areas. NC-11 also may have been impacted by a similar mechanism.

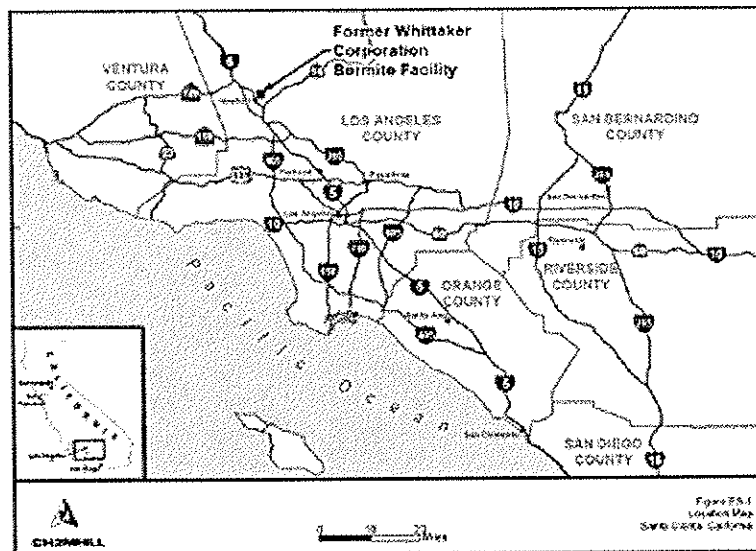

#### **ES.6 Recommendations**

The site characterization data obtained during the project, integrated with pertinent data made available to USACE by CLWA and Whittaker, provided the basis for the conceptual hydrogeology presented in Section 4, a robust working framework for ongoing work in the eastern Santa Clarita Valley. The body of data also provided the basis for refining the primary conceptual migration pathways. USACE recommends continuing groundwater monitoring activities to confirm the results of the baseline assessment and to evaluate potential changes in groundwater concentrations over time.

Although a large amount of data is now available and a good understanding of the subsurface in the study area is achieved, there is a need for additional data to continue defining the lateral and vertical extent of impacted groundwater in the Quaternary Alluvium and the Saugus Formation. Additional site characterization is recommended to:

- Continue defining the horizontal and vertical extent of groundwater impact in the alluvium at the confluence of the Santa Clara River and the South Fork.
  - Define the vertical extent of groundwater impact in the Saugus Formation, specifically whether groundwater impact extends into HSU SV west of the Site.
  - Define the horizontal extent of groundwater impact in the Saugus Formation west of the Site and the three northern impacted production wells, V-157, SC-Saugus 1, and SC Saugus 2.
  - Continue defining the horizontal and vertical extent of groundwater impact in the Saugus Formation in the vicinity of production wells NC-11 (impacted) and NC-13 (not impacted).
- Working in conjunction with CLWA and Whittaker, USACE has proposed a program for additional site characterization that addresses these data needs.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR). The report meets the government records search requirements of ASTM Standard Practice for Environmental Site Assessments, E 1527-00. Search distances are per ASTM standard or custom distances requested by the user.

### TARGET PROPERTY INFORMATION

#### ADDRESS

CROSS VALLEY CORRIDOR  
SANTA CLARITA, CA 91350

#### COORDINATES

Latitude (North): 34.423000 - 34° 25' 22.8"  
Longitude (West): 118.525300 - 118° 31' 31.1"  
Universal Transverse Mercator: Zone 11  
UTM X (Meters): 359834.7  
UTM Y (Meters): 3809918.0  
Elevation: 1221 ft. above sea level

### USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

Target Property: 34118-D5 NEWHALL, CA  
Source: USGS 7.5 min quad index

### TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

### DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ( "reasonably ascertainable ") government records either on the target property or within the ASTM E 1527-00 search radius around the target property for the following databases:

### FEDERAL ASTM STANDARD

NPL..... National Priority List  
Proposed NPL..... Proposed National Priority List Sites

### STATE ASTM STANDARD

Notify 65..... Proposition 65 Records  
Toxic Pits..... Toxic Pits Cleanup Act Sites  
WMUDS/SWAT..... Waste Management Unit Database  
CA BOND EXP. PLAN..... Bond Expenditure Plan  
INDIAN UST..... Underground Storage Tanks on Indian Land

## EXECUTIVE SUMMARY

INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land

### FEDERAL ASTM SUPPLEMENTAL

CONSENT..... Superfund (CERCLA) Consent Decrees  
ROD..... Records Of Decision  
Delisted NPL..... National Priority List Deletions  
HMIRS..... Hazardous Materials Information Reporting System  
MLTS..... Material Licensing Tracking System  
MINES..... Mines Master Index File  
NPL Liens..... Federal Superfund Liens  
PADS..... PCB Activity Database System  
FUDS..... Formerly Used Defense Sites  
INDIAN RESERV..... Indian Reservations  
DOD..... Department of Defense Sites  
US BROWNFIELDS..... A Listing of Brownfields Sites  
TSCA..... Toxic Substances Control Act  
FTTS INSP..... FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

### STATE OR LOCAL ASTM SUPPLEMENTAL

DEED..... List of Deed Restrictions  
AOCONCERN..... San Gabriel Valley Areas of Concern

### EDR PROPRIETARY HISTORICAL DATABASES

Coal Gas..... Former Manufactured Gas (Coal Gas) Sites

### BROWNFIELDS DATABASES

US BROWNFIELDS..... A Listing of Brownfields Sites

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### FEDERAL ASTM STANDARD

## EXECUTIVE SUMMARY

**CERCLIS:** The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 02/26/2004 has revealed that there are 5 CERCLIS sites within approximately 2 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>

<b>REXHALL INDUSTRIES INCORPORATE</b>	<b>25655 SPRINGBROOK AVE.</b>	<b>1 - 2 SSW</b>	<b>BB352</b>	<b>267</b>

**CERCLIS-NFRAP:** As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund Action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

A review of the CERC-NFRAP list, as provided by EDR, and dated 02/26/2004 has revealed that there are 3 CERC-NFRAP sites within approximately 2 miles of the target property.

## EXECUTIVE SUMMARY

**RCRIS:** Resource Conservation and Recovery Information System. RCRIS includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs): generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs): generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs): generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRIS-TSD list, as provided by EDR, and dated 04/13/2004 has revealed that there are 2 RCRIS-TSD sites within approximately 2 miles of the target property.

### STATE ASTM STANDARD

**AWP:** California DTSC's Annual Workplan, formerly known as BEP, identifies known hazardous substance sites targeted for cleanup. The source is the California Environmental Protection Agency.

A review of the AWP list, as provided by EDR, and dated 03/02/2004 has revealed that there is 1 AWP site within approximately 2 miles of the target property.

<b>WHITTAKER/BERMITE FACILITY</b>	<b>22116 SOLEDAD CANYON RD</b>	<b>1/2 - 1 S</b>	<b>C10</b>	<b>18</b>

**CAL-SITES:** Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control.

A review of the Cal-Sites list, as provided by EDR, has revealed that there is 1 Cal-Sites site within approximately 2 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
<b>WHITTAKER/BERMITE FACILITY</b>	<b>22116 SOLEDAD CANYON RD</b>	<b>1/2 - 1 S</b>	<b>C10</b>	<b>18</b>

**CHMIRS:** The California Hazardous Material Incident Report System contains information on reported hazardous material incidents, i.e., accidental releases or spills. The source is the California Office of Emergency Services.

A review of the CHMIRS list, as provided by EDR, and dated 12/31/2002 has revealed that there are 25 CHMIRS sites within approximately 2 miles of the target property.

## EXECUTIVE SUMMARY

**UST:** The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 04/13/2004 has revealed that there are 19 UST sites within approximately 2 miles of the target property.

### FEDERAL ASTM SUPPLEMENTAL

**FINDS:** The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 04/08/2004 has revealed that there are 79 FINDS sites within approximately 2 miles of the target property.

## EXECUTIVE SUMMARY

**NFE:** This category contains properties that are suspected of being contaminated. These are unconfirmed contaminated properties that need to be assessed using the PEA process. PEA in Progress indicates properties where DTSC has determined a PEA is required, but not currently underway.

A review of the NFE list, as provided by EDR, and dated 03/02/2004 has revealed that there is 1 NFE site within approximately 2 miles of the target property.

NEWHALL LAND & FARMING CO.	23800 VALENCIA	1 - 2 WSW	545	401

**HAZNET:** The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list, as provided by EDR, has revealed that there are 223 HAZNET sites within approximately 2 miles of the target property.

### BROWNFIELDS DATABASES

**VCP:** Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 03/02/2004 has revealed that there are 2 VCP sites within approximately 2 miles of the target property.

 Comments :

After review of a PEA and supplemental information, the Department concurred with the NFA recommendation. The site is identified as a 10.3 acre Santa Clarita Commuter Rail Station site. It comprises a very small portion of the Whittaker Bermite RCRA facility. The subject site did not house any of the RCRA units.

The site composed of 976 acres and 23 acres out of it is in a purchase offer with the city of Santa Clarita for the construction of commuter rail road station. 10.3 acres of this 23 acres property is discussed under Site A. The Halifax Powder Company opened the facility in 1906 which was purchased by the Bermite Corp in 1930s. Whittaker Corp purchased the property from Bermite in 1967. The facility was closed in 1987. The buildings have been demolished and the facility is currently not operated. The explosives manufacturing plant at the Bermite Facility operated between 1906 and 1987. At the time of closure in 1987, 14 RCRA Unit with ISD Permits had operated at the site. A history of on-site disposal and accidental explosion had occurred at the site. The 10.3 acre parcel was used as a storage area in the past. The site is listed on cortese. Also, listed on RWQCB's LUST. Martin Industrial Plumbing used the site for storage of Haz Waste containers, drumpsters, and tanker-tracter trailers. Stained areas were noted on the property. A PEA is required due to the evidence onsite contamination. Database verification project confirms NFA for DTSC.

RCRIS Corrective Action Summary:

- Event: CA Prioritization, Facility or area was assigned a high corrective action priority.
- Event Date: 06/09/1998
- Event: Current Human Exposures under Control, Current human exposures are NOT under control.
- Event Date: 06/09/1998
- Event: Igration of Contaminated Groundwater under Control, Unacceptable migration of contaminated groundwater is observed or expected.
- Event Date: 06/09/1998
- Event: Stabilization Construction Completed
- Event Date: 06/01/1996
- Event: RFI Imposition
- Event Date: 11/21/1994
- Event: Stabilization Measures Implemented, Primary measure is source removal and/or treatment (e.g., soil or waste excavation, in-situ soil treatment, off-site treatment).
- Event Date: 11/21/1994
- Event: Stabilization Measures Evaluation, This facility is not amenable to stabilization activity because of a lack of technical data. An evaluation has been completed, but further data is necessary to determine stabilization measures, feasibility or appropriateness. This status should be changed when data becomes available.
- Event Date: 03/08/1993
- Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.
- Event Date: 08/06/1992

 Facility ID: Santa Clara River 196800044  
 Facility Contact: Chuang Yueh  
 SIC Code: 919  
 Agency Name: CH2M HILL  
 Agency Address: 3 Hutton Centre Dr. St. 200  
 Santa Ana 92707  
 Agency Contact: Nancy Eldin  
 Design Flow: 0.065 Million Gal/Day  
 Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)  
 Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
 Agency Type: Private  
 Waste Type: Contaminated Ground Water - Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.  
 Threat to Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.  
 Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.  
 Reclamation: No reclamation requirements associated with this facility.  
 POTW: The POTW Does not have an approved pretreatment program. Some POTWs may have local pretreatment programs that have not been approved by the regional board and/or EPA.  
 NPDES Number: CAG914001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board  
 Subregion: 4

 Design Flow: 0.4 Million Gal/Day      Baseline Flow: 0.4 Million Gal/Day  
 Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)  
 Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
 Agency Type: Private  
 Waste Type: Miscellaneous (Includes wastes from dewatering, recreational lake overflow, swimming pool wastes, water ride wastewater, ground water seepage and other wastes of this type) - Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.  
 Threat to Water: 0  
 Complexity: Not reported  
 Reclamation: No reclamation requirements associated with this facility.  
 POTW: The facility is not a POTW.

 Adhesive Manufacturing

RCRIS Corrective Action Summary:

Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event Date: 09/15/1991

RCRIS:

Owner: AMERICAN CYANAMID COMPANY  
 (805) 259-1415

EPA ID: CAT080010929

Contact: Not reported

Classification: Large Quantity Generator, TSD

TSDF Activities: Not reported

Violation Status: Violations exist

Regulation Violated: Not reported  
 Area of Violation: TSD-FINANCIAL RESPONSIBILITY REQUIREMENTS  
 Date Violation Determined: 04/29/1994  
 Actual Date Achieved Compliance: 06/08/1994

Regulation Violated: Not reported  
 Area of Violation: GENERATOR-GENERAL REQUIREMENTS  
 Date Violation Determined: 04/29/1994  
 Actual Date Achieved Compliance: 06/08/1994

Regulation Violated: Not reported  
 Area of Violation: TSD-GENERAL STANDARDS  
 Date Violation Determined: 04/29/1994  
 Actual Date Achieved Compliance: 06/08/1994

Regulation Violated: Not reported  
 Area of Violation: TSD-CONTINGENCY PLAN REQUIREMENTS

Design Flow: Not reported Baseline Flow: Not reported  
Facility Type: Municipal/Domestic - Facility that treats sewage or a mixture of predominantly sewage and other waste from districts, municipalities, communities, hospitals, schools, and publicly or privately owned systems (excluding individual subsurface leaching systems disposing of less than 1,000 gallons per day).  
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
Agency Type: County  
Waste Type: Not reported  
Threat to Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.  
Reclamation: Not reported

Agency Address: 1955 Workman Mill Rd.  
Whittier 90607  
Agency Contact: Not reported Agency Phone: (562) 699-7411  
Design Flow: 6.5 Million Gal/Day Baseline Flow: 6.5 Million Gal/Day  
Facility Type: Municipal/Domestic - Facility that treats sewage or a mixture of predominantly sewage and other waste from districts, municipalities, communities, hospitals, schools, and publicly or privately owned systems (excluding individual subsurface leaching systems disposing of less than 1,000 gallons per day).  
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
Agency Type: County  
Waste Type: Domestic Sewage combined with Industrial Waste - Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.  
Threat to Water: Major Threat to Water Quality. A violation could render unusable a ground water or surface water resource used as a significant drink water supply, require closure of an area used for contact recreation, result in long-term deleterious effects on shell fish spawning or growth areas of aquatic resources, or directly expose the public to toxic substances.  
Complexity: Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class 1 disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.  
Reclamation: Producer: Reclamation requirements that have been issued to a producer of reclaimed water that does not use the product.  
POTW: Not reported

 Design Flow: Not reported Baseline Flow: Not reported  
 Facility Type: Not reported  
 Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
 Agency Type: Not reported  
 Waste Type: Not reported  
 Threat to Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

 SIC Code: 2821 SIC Code 2: Not reported  
 Agency Name: KEYSOR-CENTURY CORP  
 Agency Address: 0  
 Agency Contact: Not reported Agency Phone: 0  
 Design Flow: 0.095 Million Gal/Day Baseline Flow: 0.0484 Million Gal/Day  
 Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.  
 Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
 Agency Type: Private  
 Waste Type: Stormwater Runoff - Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.  
 Threat to Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Aesthetic impairment would include nuisance from a waste treatment facility.  
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.  
 Reclamation: No reclamation requirements associated with this facility.  
 POTW: The facility is not a POTW.

Comments Date : 05111994  
Comments : On May 9, 1994, the Department received a Nonemergency Hazardous Substance Release Report. The report indicates that a release of hydraulic fluid into the soil occurred at the school district's transportation service building. It was occurred at the underground hydraulic hoilst in the service garage. Approximately 30 cubic yards of impacted

**S100848272**

soil was excavated and disposed off-site. Detectable levels of TPH and Toluene are still present in the site's soil. The Department recommends a PEA due to the evidence of onsite contamination. The Department conducted a site screening. Staff completed a screening evaluation of the PEA report submitted to the Department. California Health and Safety Code, Section 25317 (Petroleum Exclusion) is applicable to this site. Based on the H&SC, Section 25317 and the information provided in the PEA report, the site does not pose a threat to public health and/or the environment. Therefore, the Department concurs with the PEA recommendation that "No Further Action" is warranted at the site.

 Reg Board: 4  
 Chemical: Gasoline  
 Lead Agency: Regional Board  
 Local Agency : 19000  
 Case Type: Other ground water affected  
 Status: Remediation Plan  
 Abate Method: Remove Free Product - remove floating product from water table, Vent  
 Soil - bore holes in soil to allow volatilization of contaminants  
 Review Date: 3/16/92 0:00 Confirm Leak: 3/16/92 0:00

 Agency Name: WESTERN WASTE MANAGEMENT  
 Agency Address: 0  
 Agency Contact: Not reported Agency Phone: 0  
 Design Flow: Not reported Baseline Flow: Not reported  
 Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)  
 Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
 Agency Type: Private  
 Waste Type: Stormwater Runoff - Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.  
 Threat to Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.  
 Reclamation: No reclamation requirements associated with this facility.  
 POTW: The POTW Does not have an approved pretreatment program. Some POTWs may have local pretreatment programs that have not been approved by the regional board and/or EPA.  
 NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board

Design Flow: Not reported Baseline Flow: Not reported  
Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)  
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
Agency Type: Private  
Waste Type: Stormwater Runoff - Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.  
Threat to Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.  
Reclamation: No reclamation requirements associated with this facility.  
POTW: The POTW Does not have an approved pretreatment program. Some POTWs may have local pretreatment programs that have not been approved by the regional board and/or EPA.  
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board

 Threat to Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.  
 Reclamation: Not reported  
 POTW: Not reported  
 NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board  
 Subregion: 4

Comments Date : 01011985  
Comments : This is the date the site was first listed AWP pursuant to Section 25356.  
ON CORTESE LIST  
DHS received EPA Federal Investigation Team's Screening Site Inspection - EPA recommends Listing Site Inspection (03/15/90). Site is a RCRA lead.  
FINAL STRATEGY SITE REFERRED: TO SCS  
DTSC reviewed and approved PEA equivalent Report. Based on the data submitted, DTSC determined that No Further Action is necessary with respect to investigation and remediation of hazardous substances in the soil at the Site.  
INSPECTION(STATE) CO ENGR. UNSATISFACTORY RAINWATER DIVRSN WARN AGAIN OF OIL/WATER COOLANT RELIEASE  
DTSC amended the VCA to include the expansion of the scope of work.  
INSPECTION(STATE) CO ENGR. NEW COOLING TOWER INSTALLED.  
RETURN TO UWE CR. NOTIFIED OF VIO.  
DTSC and RP signed a VCA Amendment to continue work after Chapter 6.8.  
INSPECTION(STATE) CO ENGR. APPROVAL FOR DISCH OF WALT BRIN TO SEWER.  
ENFORCEMENT(OTHER) CO ENGR. VIO OF IW. EFFLUENT, BORON CONTN  
INSPECTION(STATE) CO ENGR. WHITE LIQ DISCH.  
INSPECTION(STATE) CO ENGR. STORAGE OF SLUDGE ON SITE.  
INSPECTION(STATE) CO ENGR. EFFLUENT RELEASE-EXCESS BORON. RELEASE OF SOLUABLE OIL, WATER.  
INSPECTION(STATE) CO ENGR. SOLUBLE OIL DISCH.  
INSPECTION(STATE) CO ENGR. 3 WASTE-DISCH TO GROUND.  
OWNER: UNTIL 1982 THATCHER GLASS CORP -  
SUBSIDIARY OF DART INDUSTRIES  
FAC TYPE: T/C WITH M SULLIVAN, ENVR,  
(805)259-4400, 5/4/84 - 1 RECIRCULATION

 Comments :

Phase 1 - Pursuant to an agreement between the Department of Toxic Substances Control (DTSC) and the California Department of Education, DTSC's Site Mitigation Program completed a review of a Phase 1 Environmental Assessment and has determined that a Preliminary Endangerment Assessment is required. The PEA will be Conducted under DTSC's oversight pursuant to agreements between DTSC and the pertinent school district. Any subsequent cleanup Activities (if needed) after the PEA would be conducted pursuant to agreements between DTSC and the School District. DTSC entered into a Voluntary Cleanup Agreement (Docket Number HSA-A 99/00-057) with the Saugus Union School District to provide oversight for a Preliminary Endangerment Assessment for the proposed Bridgeport Elementary School site. DTSC approved the Preliminary Endangerment Assessment (PEA). Based on the information presented in the PEA, neither an actual or a potential release of hazardous material, nor the presence of naturally occurring hazardous material indicated at the site pose a threat to human health or the environment under any land use. Therefore, DTSC concurred that no further environmental investigation or cleanup was required at this site, and approved the PEA.

 Design Flow: Not reported Baseline Flow: Not reported  
 Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.  
 Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
 Agency Type: ?  
 Waste Type: Not reported  
 Threat to Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.  
 Reclamation: Not reported  
 POTW: Not reported  
 NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board

Agency Contact:	Not reported	Agency Phone:	0
Design Flow:	Not reported	Baseline Flow:	Not reported
Facility Type:	Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)		
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.		
Agency Type:	Private		
Waste Type:	Not reported		
Threat to Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.		
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.		
Reclamation:	Not reported

 Actvty Deleted Via Commitmnt/Completns Screen : Not reported  
 Special Program Code: Not reported  
 Special Program : Not reported  
 Comments Date : 02142001  
 Comments : Onsite meeting with RP to discuss PEA comments. RP will revise PEA with more information.  
 DTSC entered into a Voluntary Cleanup Agreement with proponent to review and comment on a Preliminary Endangerment Assessment.  
 DTSC comments sent to RP.  
 Lead contaminated soils were excavated. No Further Action required. PEA is completed.  
 Site visit with RP's consultants.  
 Not reported  
 DTSC sent letter to RP that a response is needed. No word from RP since site visit.  
 Not reported  
 Final Determination of Further Action letter sent to RP.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Elapsed ASTM days:** Provides confirmation that this EDR report meets or exceeds the 90-day updating requirement of the ASTM standard.

## FEDERAL ASTM STANDARD RECORDS

### **NPL: National Priority List**

Source: EPA  
Telephone: N/A

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/27/04  
Date Made Active at EDR: 05/21/04  
Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 05/04/04  
Elapsed ASTM days: 17  
Date of Last EDR Contact: 05/04/04

### **NPL Site Boundaries**

Date of Last EDR Contact: 05/04/04

### **CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System**

Source: EPA  
Telephone: 703-413-0223

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/26/04  
Date Made Active at EDR: 04/02/04  
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 03/22/04  
Elapsed ASTM days: 11  
Date of Last EDR Contact: 03/22/04

### **CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned**

Source: EPA  
Telephone: 703-413-0223

As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 02/26/04  
Date Made Active at EDR: 04/02/04

Date of Last EDR Contact: 03/08/04

### **RCRIS:** Resource Conservation and Recovery Information System

Source: EPA

Telephone: 800-424-9346

Resource Conservation and Recovery Information System. RCRIS includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs): generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs): generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs): generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 04/13/04  
Date Made Active at EDR: 05/13/04

### **FEDERAL ASTM SUPPLEMENTAL RECORDS**

#### **BRS:** Biennial Reporting System

Source: EPA/NTIS

Telephone: 800-424-9346

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/01/01  
Database Release Frequency: Biennially

Date of Last EDR Contact: 03/16/04  
Date of Next Scheduled EDR Contact: 06/14/04

#### **CONSENT:** Superfund (CERCLA) Consent Decrees

Source: EPA Regional Offices

Telephone: Varies

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: N/A  
Database Release Frequency: Varies

Date of Last EDR Contact: N/A  
Date of Next Scheduled EDR Contact: N/A

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

**ROD: Records Of Decision**

Source: EPA  
Telephone: 703-416-0223

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 01/09/04  
Database Release Frequency: Annually

Date of Last EDR Contact: 04/05/04  
Date of Next Scheduled EDR Contact: 07/05/04

**DELISTED NPL: National Priority List Deletions**

Source: EPA  
Telephone: N/A

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/27/04  
Database Release Frequency: Quarterly

Date of Last EDR Contact: 05/04/04  
Date of Next Scheduled EDR Contact: 08/02/04

**FINDS: Facility Index System/Facility Identification Initiative Program Summary Report**

Source: EPA  
Telephone: N/A

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/08/04  
Database Release Frequency: Quarterly

Date of Last EDR Contact: 04/05/04  
Date of Next Scheduled EDR Contact: 07/05/04

**HMIRS: Hazardous Materials Information Reporting System**

Source: U.S. Department of Transportation  
Telephone: 202-366-4555

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 02/17/04  
Database Release Frequency: Annually

Date of Last EDR Contact: 04/20/04  
Date of Next Scheduled EDR Contact: 07/19/04

**MLTS: Material Licensing Tracking System**

Source: Nuclear Regulatory Commission  
Telephone: 301-415-7169

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 01/15/04  
Database Release Frequency: Quarterly

Date of Last EDR Contact: 04/05/04  
Date of Next Scheduled EDR Contact: 07/05/04

**MINES: Mines Master Index File**

Source: Department of Labor, Mine Safety and Health Administration

Date of Government Version: 03/05/04  
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 03/30/04  
Date of Next Scheduled EDR Contact: 06/28/04

**NPL LIENS: Federal Superfund Liens**

Source: EPA  
Telephone: 202-564-4267

Federal Superfund Liens. Under the authority granted the USEPA by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/91  
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 03/12/04  
Date of Next Scheduled EDR Contact: 05/24/04

**PADS:** PCB Activity Database System

Source: EPA  
Telephone: 202-564-3887

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 12/30/03  
Database Release Frequency: Annually

Date of Last EDR Contact: 05/12/04  
Date of Next Scheduled EDR Contact: 08/09/04

**DOD:** Department of Defense Sites

Source: USGS  
Telephone: 703-692-8801

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 10/01/03  
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 02/02/04  
Date of Next Scheduled EDR Contact: 05/10/04

**STORMWATER:** Storm Water General Permits

Source: Environmental Protection Agency  
Telephone: 202 564-0746

A listing of all facilities with Storm Water General Permits.

Date of Government Version: N/A  
Database Release Frequency: Quarterly

Date of Last EDR Contact: N/A  
Date of Next Scheduled EDR Contact: N/A

**INDIAN RESERV:** Indian Reservations

Source: USGS  
Telephone: 202-208-3710

This map layer portrays Indian administered lands of the United States that have any area equal to or greater than 640 acres.

Date of Government Version: 10/01/03  
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 02/02/04  
Date of Next Scheduled EDR Contact: 05/10/04

**US BROWNFIELDS:** A Listing of Brownfields Sites

Source: Environmental Protection Agency  
Telephone: 202-566-2777

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become BCRLF cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 04/14/04  
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 03/15/04  
Date of Next Scheduled EDR Contact: 06/14/04

**RMP:** Risk Management Plans

Source: Environmental Protection Agency  
Telephone: 202-564-8600

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

**FUDS:** Formerly Used Defense Sites

Source: U.S. Army Corps of Engineers  
Telephone: 202-528-4285

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 10/01/03  
Database Release Frequency: Varies

Date of Last EDR Contact: 04/26/04  
Date of Next Scheduled EDR Contact: 07/05/04

**RAATS:** RCRA Administrative Action Tracking System

Source: EPA  
Telephone: 202-564-4104

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/95  
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 03/08/04  
Date of Next Scheduled EDR Contact: 06/07/04

**TRIS:** Toxic Chemical Release Inventory System

Source: EPA  
Telephone: 202-566-0250

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/01  
Database Release Frequency: Annually

Date of Last EDR Contact: 03/23/04  
Date of Next Scheduled EDR Contact: 06/21/04

**TSCA:** Toxic Substances Control Act

Source: EPA  
Telephone: 202-260-5521

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/02  
Database Release Frequency: Every 4 Years

Date of Last EDR Contact: 03/05/04  
Date of Next Scheduled EDR Contact: 06/07/04

**FTTS INSP:** FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

Date of Next Scheduled EDR Contact: 07/05/04

**CA WDS:** Waste Discharge System  
Source: State Water Resources Control Board  
Telephone: 916-341-5227  
Sites which have been issued waste discharge requirements.

Date of Government Version: 04/05/04  
Database Release Frequency: Quarterly

Date of Last EDR Contact: 03/22/04  
Date of Next Scheduled EDR Contact: 06/21/04

**DEED:** List of Deed Restrictions  
Source: Department of Toxic Substances Control  
Telephone: 916-323-3400

The use of recorded land use restrictions is one of the methods the DTSC uses to protect the public from unsafe exposures to hazardous substances and wastes.

Date of Government Version: 04/06/04  
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 04/06/04  
Date of Next Scheduled EDR Contact: 07/05/04

**NFA:** No Further Action Determination  
Source: Department of Toxic Substances Control  
Telephone: 916-323-3400

This category contains properties at which DTSC has made a clear determination that the property does not pose a problem to the environment or to public health.

Date of Government Version: 03/02/04  
Database Release Frequency: Quarterly

Date of Last EDR Contact: 03/03/04  
Date of Next Scheduled EDR Contact: 05/31/04

**EMI:** Emissions Inventory Data  
Source: California Air Resources Board  
Telephone: 916-322-2990  
Toxics and criteria pollutant emissions data collected by the ARB and local air pollution agencies.

Date of Government Version: 12/31/02  
Database Release Frequency: Varies

Date of Last EDR Contact: 04/20/04  
Date of Next Scheduled EDR Contact: 07/19/04

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### **REF:** Unconfirmed Properties Referred to Another Agency

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

This category contains properties where contamination has not been confirmed and which were determined as not requiring direct DTSC Site Mitigation Program action or oversight. Accordingly, these sites have been referred to another state or local regulatory agency.

Date of Government Version: 03/02/04

Database Release Frequency: Quarterly

Date of Last EDR Contact: 03/03/04

Date of Next Scheduled EDR Contact: 05/31/04

### **SCH:** School Property Evaluation Program

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 03/02/04

Database Release Frequency: Quarterly

Date of Last EDR Contact: 03/03/04

Date of Next Scheduled EDR Contact: 05/31/04

### **NFE:** Properties Needing Further Evaluation

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

This category contains properties that are suspected of being contaminated. These are unconfirmed contaminated properties that need to be assessed using the PEA process. PEA in Progress indicates properties where DTSC is currently conducting a PEA. PEA Required indicates properties where DTSC has determined a PEA is required, but not currently underway.

Date of Government Version: 03/02/04

Database Release Frequency: Quarterly

Date of Last EDR Contact: 03/03/04

Date of Next Scheduled EDR Contact: 05/31/04

### **HAZNET:** Hazardous Waste Information System

Source: California Environmental Protection Agency

Telephone: 916-255-1136

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Date of Government Version: 12/31/02

Database Release Frequency: Annually

Date of Last EDR Contact: 05/10/04

Date of Next Scheduled EDR Contact: 08/09/04

### **SLIC REG 1:** Active Toxic Site Investigations

Source: California Regional Water Quality Control Board, North Coast Region (1)  
Telephone: 707-576-2220

Date of Government Version: 04/03/03  
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 02/23/04  
Date of Next Scheduled EDR Contact: 05/24/04

### **SLIC REG 2:** Spills, Leaks, Investigation & Cleanup Cost Recovery Listing

Source: Regional Water Quality Control Board San Francisco Bay Region (2)  
Telephone: 510-286-0457

Any contaminated site that impacts groundwater or has the potential to impact groundwater.

Date of Government Version: 03/31/04  
Database Release Frequency: Quarterly

Date of Last EDR Contact: 04/12/04  
Date of Next Scheduled EDR Contact: 07/12/04

### **SLIC REG 3:** Spills, Leaks, Investigation & Cleanup Cost Recovery Listing

Source: California Regional Water Quality Control Board Central Coast Region (3)  
Telephone: 805-549-3147

Any contaminated site that impacts groundwater or has the potential to impact groundwater.

Date of Government Version: 09/16/03  
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 02/16/04  
Date of Next Scheduled EDR Contact: 05/17/04

### **SLIC REG 4:** Spills, Leaks, Investigation & Cleanup Cost Recovery Listing

Source: Region Water Quality Control Board Los Angeles Region (4)  
Telephone: 213-576-6600

Any contaminated site that impacts groundwater or has the potential to impact groundwater.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## BROWNFIELDS DATABASES

### **VCP: Voluntary Cleanup Program Properties**

Source: Department of Toxic Substances Control  
Telephone: 916-323-3400

Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Date of Government Version: 03/02/04  
Database Release Frequency: Quarterly

Date of Last EDR Contact: 03/03/04  
Date of Next Scheduled EDR Contact: 05/31/04

### **US BROWNFIELDS: A Listing of Brownfields Sites**

Source: Environmental Protection Agency  
Telephone: 202-566-2777

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become BCRLF cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: N/A  
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: N/A  
Date of Next Scheduled EDR Contact: N/A

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

**Oil/Gas Pipelines:** This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

### **Electric Power Transmission Line Data**

Source: PennWell Corporation  
Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### **AHA Hospitals:**

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### **Medical Centers: Provider of Services Listing**

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### **Nursing Homes**

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### **Public Schools**

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### **Private Schools**

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### **Daycare Centers: Licensed Facilities**

Source: Department of Social Services

Telephone: 916-657-4041

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 from the U.S. Fish and Wildlife Service.

### **STREET AND ADDRESS INFORMATION**

## GEOCHECK<sup>®</sup>- PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

CROSS VALLEY CONNECTOR EAST  
CROSS VALLEY CORRIDOR  
SANTA CLARITA, CA 91350

### TARGET PROPERTY COORDINATES

Latitude (North):	34.423000 - 34° 25' 22.8"
Longitude (West):	118.525299 - 118° 31' 31.1"
Universal Transverse Mercator:	Zone 11
UTM X (Meters):	359834.7
UTM Y (Meters):	3809918.0
Elevation:	1221 ft. above sea level

EDR's GeoCheck Physical Setting Source Addendum has been developed to assist the environmental professional with the collection of physical setting source information in accordance with ASTM 1527-00, Section 7.2.3. Section 7.2.3 requires that a current USGS 7.5 Minute Topographic Map (or equivalent, such as the USGS Digital Elevation Model) be reviewed. It also requires that one or more additional physical setting sources be sought when (1) conditions have been identified in which hazardous substances or petroleum products are likely to migrate to or from the property, and (2) more information than is provided in the current USGS 7.5 Minute Topographic Map (or equivalent) is generally obtained, pursuant to local good commercial or customary practice, to assess the impact of migration of recognized environmental conditions in connection with the property. Such additional physical setting sources generally include information about the topographic, hydrologic, hydrogeologic, and geologic characteristics of a site, and wells in the area.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata. EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

USGS Topographic Map: 34118-D5 NEWHALL, CA  
 General Topographic Gradient: General SSW  
 Source: USGS 7.5 min quad index

### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<p><u>Target Property County</u> LOS ANGELES, CA</p>	<p>FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map</p>
<p>Flood Plain Panel at Target Property:</p>	<p>0607290345C</p>
<p>Additional Panels in search area:</p>	<p>0650430345B 0607290365C 0607290460C</p>

## NATIONAL WETLAND INVENTORY

<p><u>NWI Quad at Target Property</u> NEWHALL</p>	<p>NWI Electronic <u>Data Coverage</u> Not Available</p>
---	--

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### Site-Specific Hydrogeological Data\*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles SW
Site Name:	HASA CHEM INC
Site EPA ID Number:	CAD009656075
Groundwater Flow Direction:	GENERALLY W IN BOTH THE ALLUVIAL AND SAUGUS AQUIFERS.
Inferred Depth to Water:	approximately 52 feet.
Hydraulic Connection:	The site is underlain by a near-surface alluvial aquifer and the underlying Saugus aquifer that are separated by a relatively impermeable layer.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

\* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

### ROCK STRATIGRAPHIC UNIT

Era: Cenozoic  
System: Tertiary  
Series: Pliocene  
Code: Tpc (decoded above as Era, System & Series)

### GEOLOGIC AGE IDENTIFICATION

Category: Continental Deposits

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: PICO

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 8.40 Min: 7.90
2	14 inches	54 inches	stratified	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 8.40 Min: 7.90
3	54 inches	60 inches	stratified	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 8.40 Min: 7.90

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: clay loam  
sand  
gravelly - sand  
gravelly - sandy loam  
loamy sand  
loam  
silty clay loam

Surficial Soil Types: clay loam  
sand  
gravelly - sand  
gravelly - sandy loam  
loamy sand  
loam  
silty clay loam

Shallow Soil Types: loamy fine sand

Deeper Soil Types: loam  
coarse sand

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## ADDITIONAL ENVIRONMENTAL RECORD SOURCES

According to ASTM E 1527-00, Section 7.2.2, "one or more additional state or local sources of environmental records may be checked, in the discretion of the environmental professional, to enhance and supplement federal and state sources... Factors to consider in determining which local or additional state records, if any, should be checked include (1) whether they are reasonably ascertainable, (2) whether they are sufficiently useful, accurate, and complete in light of the objective of the records review (see 7.1.1), and (3) whether they are obtained, pursuant to local, good commercial or customary practice." One of the record sources listed in Section 7.2.2 is water well information. Water well information can be used to assist the environmental professional in assessing sources that may impact groundwater flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### **USGS 7.5' Digital Elevation Model (DEM)**

Source: United States Geologic Survey  
EDR acquired the USGS 7.5' Digital Elevation Model in 2002. 7.5-Minute DEMs correspond to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 from the U.S. Fish and Wildlife Service.

## HYDROGEOLOGIC INFORMATION

### **AQUIFLOW<sup>®</sup> Information System**

Source: EDR proprietary database of groundwater flow information  
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### **Geologic Age and Rock Stratigraphic Unit**

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### **STATSGO: State Soil Geographic Database**

Source: Department of Agriculture, Natural Resources Conservation Services  
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

## ADDITIONAL ENVIRONMENTAL RECORD SOURCES

### **FEDERAL WATER WELLS**

#### **PWS: Public Water Systems**

Source: EPA/Office of Drinking Water  
Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### **PWS ENF: Public Water Systems Violation and Enforcement Data**

Source: EPA/Office of Drinking Water  
Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### **USGS Water Wells: USGS National Water Inventory System (NWIS)**

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## STATE RECORDS

### California Drinking Water Quality Database

Source: Department of Health Services  
Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations for District 2, 3, 5 and 6

Source: Department of Conservation  
Telephone: 916-323-1779

## RADON

### State Database: CA Radon

Source: Department of Health Services  
Telephone: 916-324-2208  
Radon Database for California

### Area Radon Information

Source: USGS  
Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

### EPA Radon Zones

Source: EPA  
Telephone: 703-356-4020  
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## OTHER

### Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

### Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

**California Earthquake Fault Lines:** The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.
